

Revenues and Expenditures for Public Elementary and Secondary Education: FY 21

FINANCE TABLES
May 2023

NCES 2023-301
U.S. DEPARTMENT OF EDUCATION

A Publication of the National Center for Education Statistics at IES

This set of tables introduces new data for national and state-level public elementary and secondary revenues and expenditures for fiscal year (FY) 2021. Specifically, these tables include the following school finance data:

- revenue and expenditure totals;
- revenues by source;
- expenditures by function and object;
- current expenditures;¹
- revenues and current expenditures per pupil;²
- expenditures from Title I funds; and
- revenues and expenditures from COVID-19 Federal Assistance Funds.

The expenditure functions include instruction, instructional staff support services, student support services, general administration, school administration, operations and maintenance, student transportation, other support services (such as business services), food services, and enterprise operations. Objects reported within a function include salaries and wages, employee benefits,

purchased services, supplies, and equipment.

The finance data used in these tables are from the National Public Education Financial Survey (NPEFS), a component of the Common Core of Data (CCD). The CCD is the primary National Center for Education Statistics (NCES) database on public elementary and secondary education in the United States.

State education agencies (SEAs) in each of the 50 states; the District of Columbia; and the five other jurisdictions of American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, Puerto Rico, and the U.S. Virgin Islands report these data annually to NCES.

The tables in this report present descriptive information on the revenues and expenditures for FY 21. The tables chosen for this report demonstrate the range of information available when using NPEFS. They do not represent all of the data and are not meant to emphasize any particular issue.

Revenues and Expenditures for Public Elementary and Secondary Education: FY 20 (NCES 2022-301) <https://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2022301>

Revenues and Expenditures for Public Elementary and Secondary School Districts: FY 20 (NCES 2022-303) <https://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2022303>

DATA

The tables present data from the FY 21 NPEFS provisional (version 1a) data file and the FY 20 NPEFS final (version 2a) data file.³ Tables for FY 20 can be found online at https://nces.ed.gov/ccd/data_tables.asp. The student membership data used in these tables come from the State Nonfiscal Public Elementary/Secondary Education Survey, school year 2018-19 through 2020-21 version 1a.⁴ The Title I allocation amounts used in this report are derived from the U.S.

Department of Education state budget tables by program.⁵

SEAs report data for CCD surveys annually to NCES. The U.S. Census Bureau conducts the data collection for the finance surveys on behalf of NCES. NCES collects data for all three CCD nonfiscal universe surveys through the ED*Facts* submission system. SEAs participate in CCD voluntarily, following standard definitions for the data items they report.

The NPEFS instructions ask SEAs to report revenues and expenditures covering prekindergarten through high school public education in regular, special, and vocational schools; charter schools; and state-run education programs (such as special education schools or education programs for incarcerated youth).

For definitions of finance terms and more information about the methodology used in these surveys, see the following report:

ENDNOTES

¹ Current expenditures comprise expenditures for the day-to-day operation of schools and school districts for public elementary and secondary education, including

expenditures for staff salaries and benefits, supplies, and purchased services. General administration expenditures and school administration expenditures are also included in current expenditures. Expenditures associated with repaying debts and capital outlays (e.g., purchases of land, school construction, and equipment) are excluded from current expenditures. Programs outside the scope of public prekindergarten through grade 12 education, such as community services and adult education, are not included in current expenditures. Payments to private schools and payments to charter schools outside of the school district are also excluded from current expenditures. Researchers generally use current expenditures instead of total expenditures when comparing education spending between states or across districts because current expenditures exclude expenditures for capital outlay, which tend to have dramatic increases and decreases from year to year. Also, many school districts support community services, adult education, private education, and other nonelementary-secondary programs, which are included in total expenditures. These programs and the extent to which they are funded by school districts vary greatly both across and within states and school districts.

² Revenues per pupil is calculated by dividing total revenues by student membership. Current expenditures per pupil is calculated by dividing total current expenditures by student membership. The student membership data are derived from the State Nonfiscal Public Elementary/Secondary Education Survey.

³ The FY 19 and FY 20 data presented in tables 2, 5, and 9 of this report were adjusted to FY 21 dollars. Inflation adjustments utilize the Consumer Price Index (CPI) published by the U.S. Department of Labor, Bureau of Labor Statistics. This price index measures the average change in inflation of a fixed market basket of goods and

services purchased by consumers. For comparability with the time period covered by fiscal education data, NCES adjusts the CPI from a calendar year to a school fiscal year basis (July through June). See *Digest of Education Statistics 2021*, table 106.75. Retrieved March 9, 2023, from https://nces.ed.gov/programs/digest/d21/tables/dt21_106.75.asp. The FY 20 amount adjusted to FY 21 dollars is equal to the FY 20 amount multiplied by the 2020-21 CPI (263.151) and then divided by the 2019-20 CPI (257.230). The FY 19 amount adjusted to FY 21 dollars is equal to the FY 19 amount multiplied by the 2020-21 CPI (263.151) and then divided by the 2018-19 CPI (253.268).

⁴ The FY 21 NPEFS data file includes total student membership reported on the school year 2020-21 State Nonfiscal Public Elementary/Secondary Education Survey that includes grades prekindergarten through grade 12 (plus ungraded). If the reported fiscal data exclude prekindergarten programs, total membership on the NPEFS data file also excludes prekindergarten membership. As part of the FY 21 NPEFS collection process, NCES asked SEAs to review student membership data from the State Nonfiscal Public Elementary/Secondary Education Survey and verify that the membership data are consistent with the programs covered in the revenues and expenditures data reported in NPEFS.

Arizona, New York, and Oregon indicated that the state fiscal data reported in NPEFS did not include finance data for prekindergarten programs. In these states, the NPEFS total student membership variable excludes prekindergarten membership. California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. In FY 19 and FY 21, the prekindergarten membership reported in the State Nonfiscal Public Elementary/Secondary Education Survey public release file was imputed based on the number of preschool students with disabilities, as

reported for the Individuals with Disabilities Education Act. Prekindergarten membership is likely much higher; therefore, the NPEFS total student membership variable excludes all prekindergarten membership counts reported in the State Nonfiscal Public Elementary/Secondary Education Survey for California in FY 19, FY 20, and FY 21. For FY 19, FY 20, and FY 21, California reported expenditures for the California State Preschool Program separately, and these expenditures were excluded from the amounts in these tables. However, expenditures for special education preschool programs are included along with K-12 expenditures.

Illinois and New Hampshire indicated that the state fiscal data reported in NPEFS did not include independent charter school districts, and students in those independent charter school districts are excluded from the NPEFS total student membership.

⁵ These tables present the calculated allocation amounts for Title I grants under the Elementary and Secondary Education Act. Schools with high percentages of children from low-income families are eligible for Title I grants, based primarily on census poverty estimates as published by the U.S. Department of Education for the following formula grant programs: Grants to Local Education Agencies (Basic, Concentration, Targeted, and Education Finance Incentive Grants), Migrant Education, and Neglected and Delinquent Children. Title I grants data are from *Digest of Education Statistics 2021*, table 401.60. Retrieved March 9, 2023, from https://nces.ed.gov/programs/digest/d21/tables/dt21_401.60.asp. FY 20 U.S. Department of Education funds are available for spending by school districts beginning with the 2020-21 school year. Allocations were made in FY 20 and became available for use in the 2020-21 school year. Actual amounts received by local education

agencies (LEAs) may be smaller than those presented due to state-level adjustments to federal Title I allocations and permitted state reservations for administration and school improvement activities.

Title I expenditures are reported by states on NPEFS as either current year or carryover expenditures. A provision in the Title I statute allows LEAs to carry over a portion of the funds allocated to be spent in future fiscal years; however, some states did not separate carryover expenditures from current year expenditures in their NPEFS reporting. As a result, current year expenditures may exceed the total allocation amount for a particular state.

LEAs may also receive Title I funding through competitive grant programs. Title I expenditures reported on NPEFS include all expenditures for Title I programs, including both formula and competitive grants. While these competitive programs account for a small proportion of total Title I funds, the inclusion of these programs may cause expenditures to exceed the total allocation amount for a particular state.

The law does not stipulate how Title I funds are to be spent. Many Title I funds are used to support schoolwide programs, such as extended-day kindergarten programs; learning laboratories in mathematics, science, and computers; afterschool and summer programs to extend and reinforce the regular school curriculum; and other services to extend and accelerate academic progress. Thus, Title I expenditures per pupil are calculated by dividing the total of current year and carryover expenditures by student membership, which includes both Title I eligible students and noneligible students.

For more information on the distribution of Title I funds, see <https://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2019016>.

† Not applicable.

¹ Local revenues include intermediate revenues from education agencies with fundraising capabilities that operate between the state and local government levels.

² Revenues from federal sources include amounts received from funds authorized by the Coronavirus Aid, Relief, and Economic Security (CARES) Act of 2020, the Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act of 2021, and the American Rescue Plan (ARP) Act of 2021. Local education agencies (LEAs) do not begin receiving federal funds that flow through the state until after allocations are made by the federal government, assurances and certifications are signed and awards are made by the state, and reimbursement for expenditures is requested by the LEA. Because of this process, there is a lag between the time when the funds are appropriated and when LEAs record the amounts as revenues.

³ Current expenditures include instruction, instruction-related, support services, and other elementary/secondary current expenditures, but exclude expenditures on capital outlay, other programs, and interest on long-term debt.

⁴ Capital outlay includes expenditures on property and construction of facilities.

⁵ Other program expenditures include expenditures for community services, adult education, community colleges, private schools, interest on debt, and other programs that are not part of preK–12 public education.

⁶ United States totals include the 50 states and the District of Columbia.

⁷ California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. California reported prekindergarten expenditures separately, and these overall expenditures were excluded from the amounts reported in this table. This table does include expenditures for special education preschool programs along with K–12 expenditures in California.

⁸ Value affected by redistribution of reported values to correct for missing data items and/or to distribute state direct support expenditures.

⁹ Value contains imputation for missing data.

¹⁰ Reported state revenue data are revenues received from the central government of the jurisdiction.

NOTE: Detail may not sum to totals because of rounding. Total revenues do not include proceeds from bond sales or the sale of property or equipment, nor do they include the use of existing assets or securities. Expenditures made from these funds are included. Therefore, in some instances, total expenditures may exceed total revenues.

Wisconsin	15,365	15,645	1.8	16,432	5.0
Wyoming	19,895	19,789	-0.5	20,824	5.2
Other jurisdictions					
American Samoa	6,610	7,125	7.8	7,611	6.8
Guam	11,013	11,379	3.3	12,615	10.9
Commonwealth of the Northern Mariana Islands	—	—	—	—	—
Puerto Rico	8,725	7,737	-11.3	8,625	11.5
U.S. Virgin Islands	21,033	20,912	-0.6	34,856	66.7 ¹⁰

— Not available. Data are missing for the Commonwealth of the Northern Mariana Islands because the jurisdiction did not report student membership.

¹ Revenues per pupil are calculated by dividing total revenues by membership. The student membership variable is derived from the State Nonfiscal Public Elementary/Secondary Education Survey. In FY 21, Arizona, New York, and Oregon indicated that the state fiscal data reported in the National Public Education Financial Survey (NPEFS) did not include finance data for prekindergarten programs. In these states, the NPEFS total student membership variable excludes prekindergarten membership. Illinois and New Hampshire indicated that the state fiscal data reported in NPEFS did not include independent charter school districts, and students in those independent charter school districts are excluded from the NPEFS total student membership. California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. In FY 19 and FY 21, the prekindergarten membership reported in the State Nonfiscal Public Elementary/Secondary Education Survey public release file was imputed based on the number of preschool students with disabilities, as reported for the Individuals with Disabilities Education Act (IDEA). Prekindergarten membership is likely much higher; therefore, the NPEFS total student membership variable excludes all prekindergarten membership counts reported in the State Nonfiscal Public Elementary/Secondary Education Survey for California in FY 19, FY 20, and FY 21.

² Revenues from federal sources include amounts received from funds authorized by the Coronavirus Aid, Relief, and Economic Security (CARES) Act of 2020, the Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act of 2021, and the American Rescue Plan (ARP) Act of 2021. Local education agencies (LEAs) do not begin receiving federal funds that flow through the state until after allocations are made by the federal government, assurances and certifications are signed and awards are made by the state, and reimbursement for expenditures is requested by the LEA. Because of this process, there is a lag between the time when the funds are appropriated and when LEAs record the amounts as revenues. As a result, a small proportion of the total amount allocated under these acts is reported as revenue for FY 20. In FY 21, the revenue from these acts contributed to a large increase in total revenues in several states.

³ United States totals include the 50 states and the District of Columbia.

⁴ In California for FY 21, Grants-in-Aid from the Federal Government through the State increased approximately \$7.2 billion. The increase was mainly due to the increased COVID-19 Federal assistance funds.

⁵ In Delaware for FY 20, revenue from property tax increased \$80 million and Revenue from State Sources increased \$278.7 million.

⁶ In Maine for FY 21, revenue from state sources and Grants-in-Aid from the Federal Government through the State increased \$102.6 million and \$293.7 million, respectively.

⁷ In Mississippi for FY 21, revenue from Grants-in-Aid from the Federal Government through the State increased \$367 million.

⁸ In Montana for FY 21, revenue from Grants-in-Aid from the Federal Government through the State increased \$169 million.

⁹ In New Mexico for FY 20, revenue from federal sources increased due to an increase in funding to address issues related to the COVID-19 pandemic.

¹⁰ U.S. Virgin Islands received \$193 million in COVID-19 Federal assistance funds. These funds are recorded as revenue for FY 21.

NOTE: Data have been adjusted to FY 21 dollars to account for inflation using the Consumer Price Index (CPI), which is published by the U.S. Labor Department, Bureau of Labor Statistics. This price index measures the average change in inflation of a fixed market basket of goods and services purchased by consumers. For comparability with the time period covered by fiscal education data, NCES adjusts the CPI from a calendar year to a school fiscal year basis (July through June).

¹ Current expenditures include instruction, instruction-related, support services, and other elementary/secondary current expenditures, but exclude expenditures on capital outlay, other programs, and interest on long-term debt.

² Support services is an expenditure function divided into seven subfunctions: student support services, instructional staff support, general administration, school administration, operations and maintenance, student transportation, and other support services.

³ Enterprise operations include operations that are operated as a business, and receipts from the operation are expected to fund the enterprise (e.g., school bookstores and certain afterschool activities).

⁴ Student support services include attendance and social work, guidance, health, psychological services, speech pathology, audiology, and other student support services.

⁵ United States totals include the 50 states and the District of Columbia.

⁶ Value affected by redistribution of reported values to correct for missing data items and/or to distribute state direct support expenditures.

⁷ California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. California reported prekindergarten expenditures separately, and these expenditures were excluded from the amounts reported in this table. This table does include expenditures for special education preschool programs along with K–12 expenditures in California.

NOTE: Detail may not sum to totals because of rounding.

— Not available. Data are missing for the Commonwealth of the Northern Mariana Islands because the jurisdiction did not report student membership.

Rounds to zero.

¹ The student membership variable is derived from the State Nonfiscal Public Elementary/Secondary Education Survey. In FY 21, Arizona, New York, and Oregon indicated that the state fiscal data reported in the National Public Education Financial Survey (NPEFS) did not include finance data for prekindergarten programs. In these states, the NPEFS total student membership variable excludes prekindergarten membership. Illinois and New Hampshire indicated that the state fiscal data reported in NPEFS did not include independent charter school districts, and students in those independent charter school districts are excluded from the NPEFS total student membership. California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. In FY 21, the prekindergarten membership reported in the State Nonfiscal Public Elementary/Secondary Education Survey public release file was imputed based on the number of preschool students with disabilities, as reported for the Individuals with Disabilities Education Act (IDEA). Prekindergarten membership is likely much higher; therefore, the NPEFS total student membership variable excludes all prekindergarten membership counts reported in the State Nonfiscal Public Elementary/Secondary Education Survey for California in FY 21.

² Current expenditures include instruction, instruction-related, support services, and other elementary/secondary current expenditures, but exclude expenditures on capital outlay, other programs, and interest on long-term debt. Current expenditures per pupil are calculated by dividing current expenditures by membership.

³ Support services is an expenditure function divided into seven subfunctions: student support services, instructional staff support, general administration, school administration, operations and maintenance, student transportation, and other support services.

⁴ Enterprise operations include operations that are operated as a business, and receipts from the operation are expected to fund the enterprise (e.g., school bookstores and certain afterschool activities).

⁵ Student support services include attendance and social work, guidance, health, psychological services, speech pathology, audiology, and other student support services.

⁶ United States totals include the 50 states and the District of Columbia.

⁷ Value affected by redistribution of reported expenditure values to correct for missing data items and/or to distribute state direct support expenditures.

⁸ California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. California reported prekindergarten expenditures separately, and these expenditures were excluded from the amounts reported in this table. This table does include expenditures for special education preschool programs along with K–12 expenditures in California.

NOTE: Detail may not sum to totals because of rounding.

Table 5. Amounts and percentage changes of inflation-adjusted current expenditures per pupil, by year and state or jurisdiction: FY 2019 through FY 2021—Continued

State or jurisdiction	Current expenditures per pupil ¹				
	FY 19 (inflation- adjusted to FY 21 dollars)	FY 20 ² (inflation- adjusted to FY 21 dollars)	Percentage change FY 19– FY 20	FY 21 ²	Percentage change FY 20– FY 21
Vermont	22,045	22,634	2.7	24,050	6.3
Virginia	13,135	13,239	0.8	13,856	4.7
Washington	14,901	14,877	-0.2	15,615	5.0
West Virginia	12,748	12,938	1.5	13,279	2.6
Wisconsin	13,185	13,088	-0.7	13,687	4.6
Wyoming	16,861	17,049	1.1	18,140	6.4
Other jurisdictions					
American Samoa	5,639	7,104	26.0	7,548	6.3
Guam	10,271	11,486	11.8 ⁶	12,671	10.3 ⁶
Commonwealth of the Northern Mariana Islands	—	—	—	—	—
Puerto Rico	8,185	7,389	-9.7 ⁷	7,610	3.0
U.S. Virgin Islands	17,246	16,057	-6.9	16,376	2.0

— Not available. Data are missing for the Commonwealth of the Northern Mariana Islands because the jurisdiction did not report student membership.

Rounds to zero.

¹ Current expenditures include instruction, instruction-related, support services, and other elementary/secondary current expenditures, but exclude expenditures on capital outlay, other programs, and interest on long-term debt. Current expenditures per pupil are calculated by dividing current expenditures by membership. The student membership variable is derived from the State Nonfiscal Public Elementary/Secondary Education Survey. In FY 21, Arizona, New York, and Oregon indicated that the state fiscal data reported in the National Public Education Financial Survey (NPEFS) did not include finance data for prekindergarten programs. In these states, the NPEFS total student membership variable excludes prekindergarten membership. Illinois and New Hampshire indicated that the state fiscal data reported in NPEFS did not include independent charter school districts, and students in those independent charter school districts are excluded from the NPEFS total student membership. California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. In FY 19 and FY 21, the prekindergarten membership reported in the State Nonfiscal Public Elementary/Secondary Education Survey public release file was imputed based on the number of preschool students with disabilities, as reported for the Individuals with Disabilities Education Act (IDEA). Prekindergarten membership is likely much higher; therefore, the NPEFS total student membership variable excludes all prekindergarten membership counts reported in the State Nonfiscal Public Elementary/Secondary Education Survey for California in FY 19, FY 20, and FY 21.

² Includes current expenditures from funds authorized by the Coronavirus Aid, Relief, and Economic Security (CARES) Act of 2020, the Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act of 2021, and the American Rescue Plan (ARP) Act of 2021. Local education agencies (LEAs) do not begin receiving federal funds that flow through the state until after allocations are made by the federal government, assurances and certifications are signed and awards are made by the state, and reimbursement for expenditures is requested by the LEA. Because of this process, there is a lag between the time when the funds are appropriated and when LEAs begin making expenditures from those funds. As a result, a small proportion of the total amount allocated under these acts was expending during FY 20. In FY 21, expenditures from these funds contributed to a large increase in current expenditures in several states.

³ United States totals include the 50 states and the District of Columbia.

⁴ California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. For FY 19 through FY 21, California reported prekindergarten expenditures separately, and these expenditures were excluded from the amounts reported in this table. This table does include expenditures for special education preschool programs along with K–12 expenditures in California.

⁵ Maine's increase in current expenditures per pupil from the prior year is due to a decrease in membership combined with an increase in instruction and operations and maintenance expenditures to respond to COVID-19.

⁶ Guam's increase in current expenditures per pupil from the prior year is due to increases in instructional support and operations and maintenance expenditures to respond to COVID-19.

⁷ In FY 20, Puerto Rico's schools were closed for certain periods of time due to both earthquakes in the southern area of the island and precautionary measures for COVID-19. These closures affected the provision of services for the school year.

NOTE: Data have been adjusted to FY 21 dollars to account for inflation using the Consumer Price Index (CPI), which is published by the U.S. Labor Department, Bureau of Labor Statistics. This price index measures the average change in inflation of a fixed market basket of goods and services purchased by consumers. For comparability with the time period covered by fiscal education data, NCES adjusts the CPI from a calendar year to a school fiscal year basis (July through June).

¹ Current expenditures include instruction, instruction-related, support services, and other elementary/secondary current expenditures, but exclude expenditures on capital outlay, other programs, and interest on long-term debt.

² Includes instruction and instructional staff support services current expenditures. Expenditures for instruction and instructional staff support services include expenditures that are directly related to providing instruction and for activities that assist with classroom instruction. The instruction and instruction-related expenditures category is more expansive than only instruction expenditures. Specifically, the instruction and instruction-related expenditures category includes salaries and benefits for teachers, teaching assistants, librarians and library aides, in-service teacher trainers, curriculum development, student assessment, technology (for students, but outside the classroom), and supplies and purchased services related to those activities.

³ Includes student support services, operation and maintenance of plant, student transportation, general administration, school administration, and other support services.

⁴ Includes food services and enterprise operations current expenditures.

⁵ Total current expenditures for all functions is the sum of total instruction and instruction-related current expenditures, total support services current expenditures, and total current expenditures for all other functions. Detail may not sum to totals because of rounding.

⁶ The total column includes expenditures other than salaries and wages and employee benefits (e.g., purchased services and supplies, etc.). These details are not presented in this table.

⁷ United States totals include the 50 states and the District of Columbia.

⁸ Value affected by redistribution of reported values to correct for missing data items and/or to distribute state direct support expenditures.

⁹ California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. California reported prekindergarten expenditures separately, and these expenditures were excluded from the amounts reported in this table. This table does include expenditures for special education preschool programs along with K–12 expenditures in California.

¹ Current expenditures include instruction, instruction-related, support services, and other elementary/secondary current expenditures, but exclude expenditures on capital outlay, other programs, and interest on long-term debt.

² Other program expenditures include expenditures for community services, adult education, community colleges, private schools, and other programs that are not part of public elementary and secondary education.

³ Equipment includes expenditures for initial, additional, and replacement items of equipment, such as machinery, furniture and fixtures, and vehicles. Equipment may be purchased for instruction, support services, food services, enterprise operations, facilities acquisition and construction, or other programs.

⁴ United States totals include the 50 states and the District of Columbia.

⁵ California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. California reported prekindergarten expenditures separately, and these expenditures were excluded from the amounts reported in this table. This table does include expenditures for special education preschool programs along with K–12 expenditures in California.

⁶ Value affected by redistribution of reported values to correct for missing data items and/or to distribute state direct support expenditures.

⁷ Value contains imputation for missing data.

NOTE: Detail may not sum to totals because of rounding.

Guam	21,679	27,497	348,421	0	0	12,671	0
Commonwealth of the Northern Mariana Islands							
	12,094	—	93,376	0	0	—	—
Puerto Rico	391,656	276,413	2,103,412	242,144	42,063	7,610	1,028
U.S. Virgin Islands	10,438	10,993	180,024	0	0	16,376	0

— Not available. Data are missing for the Commonwealth of the Northern Mariana Islands because the jurisdiction did not report student membership.

¹ FY 20 U.S. Department of Education funds are available for spending by school districts beginning with the 2020–21 school year. Title I grants for the disadvantaged include allocations for Grants to Local Education Agencies (Basic, Concentration, Targeted, and Education Finance Incentive Grants); Migrant Education Grants; and Neglected and Delinquent Children Grants.

² The student membership variable is derived from the State Nonfiscal Public Elementary/Secondary Education Survey. In FY 21, Arizona, New York, and Oregon indicated that the state fiscal data reported in the National Public Education Financial Survey (NPEFS) did not include finance data for prekindergarten programs. In these states, the NPEFS total student membership variable excludes prekindergarten membership. Illinois and New Hampshire indicated that the state fiscal data reported in NPEFS did not include independent charter school districts, and students in those independent charter school districts are excluded from the NPEFS total student membership. California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. In FY 21, the prekindergarten membership reported in the State Nonfiscal Public Elementary/Secondary Education Survey public release file was imputed based on the number of preschool students with disabilities, as reported for the Individuals with Disabilities Education Act (IDEA). Prekindergarten membership is likely much higher; therefore, the NPEFS total student membership variable excludes all prekindergarten membership counts reported in the State Nonfiscal Public Elementary/Secondary Education Survey for California in FY 21.

³ Current expenditures include instruction, instruction-related, support services, and other elementary/secondary current expenditures, but exclude expenditures on capital outlay, other programs, and interest on long-term debt.

⁴ Current expenditures per pupil are calculated by dividing current expenditures by membership.

⁵ Title I expenditures per pupil are calculated as current and carryover expenditures divided by total membership, which includes both Title I eligible students and noneligible students. Title I expenditures per pupil are included in current expenditures per pupil.

⁶ Title I expenditures are expenditures from the original Title I grant under the Elementary and Secondary Education Act.

⁷ Title I carryover expenditures are expenditures made against the original Title I grant of the prior fiscal year.

⁸ United States totals include the 50 states and the District of Columbia.

⁹ California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. California reported prekindergarten expenditures separately, and these expenditures were excluded from the amounts reported in this table. This table does include expenditures for special education preschool programs along with K–12 expenditures in California.

¹⁰ Value affected by redistribution of reported values to correct for missing data items and/or to distribute state direct support expenditures.

Current expenditures per pupil ⁹	13,496 ⁶	13,807 ⁶	14,295 ⁶	3.5
Expenditures for construction	63,645,033 ⁶	65,110,034 ⁶	59,979,191 ⁶	-7.9
Expenditures for land and existing structures	5,687,273 ⁶	5,818,185 ⁶	5,701,306 ⁶	-2.0
Expenditures for equipment	11,960,491 ⁶	12,235,802 ⁶	13,694,825 ⁶	11.9
Expenditures for interest on debt	21,427,950 ⁶	21,921,185 ⁶	21,669,253 ⁶	-1.1

Rounds to zero.

¹ United States totals include the 50 states and the District of Columbia.² Except current expenditures per pupil, which are presented in dollars.³ Data have been adjusted to FY 21 dollars to account for inflation using the Consumer Price Index (CPI), which is published by the U.S. Labor Department, Bureau of Labor Statistics. This price index measures the average change in inflation of a fixed market basket of goods and services purchased by consumers. For comparability with the time period covered by fiscal education data, NCES adjusts the CPI from a calendar year to a school fiscal year basis (July through June).⁴ Revenues include funds authorized by the Coronavirus Aid, Relief, and Economic Security (CARES) Act of 2020, the Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act of 2021, and the American Rescue Plan (ARP) Act of 2021. Local education agencies (LEAs) do not begin receiving federal funds that flow through the state until after allocations are made by the federal government, assurances and certifications are signed and awards are made by the state, and reimbursement for expenditures is requested by the LEA. Because of this process, there is a lag between the time when the funds are appropriated and when LEAs record the amounts as revenues. As a result, a small proportion of the total amount allocated under these acts is reported as revenue for FY 20. In FY 21, the revenue from these acts contributed to a large increase in total revenues in several states.⁵ The subcategories of total expenditures do not include expenditures for other programs (e.g., community services, adult education, community colleges, private schools, interest on debt, and other programs that are not part of public elementary and secondary education).⁶ California did not report prekindergarten membership in the State Nonfiscal Public Elementary/Secondary Education Survey. California reported prekindergarten expenditures separately, and these expenditures were excluded from the amounts reported in this table. This table does include expenditures for special education preschool programs along with K–12 expenditures in California.⁷ The subcategories of current expenditures do not include food services and enterprise operations.⁸ Expenditures for student support services are included in total support services expenditures.⁹ Current expenditures per pupil are calculated by dividing current expenditures by membership.SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data (CCD), "National Public Education Financial Survey (NPEFS)," FY 20, Final Version 2a; and FY 21, Provisional Version 1a; and *Digest of Education Statistics 2021*, table 106.75. † Not applicable.

‡ Reporting standards not met.

¹ Revenues include funds authorized by the Coronavirus Aid, Relief, and Economic Security (CARES) Act of 2020, the Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act of 2021, and the American Rescue Plan (ARP) Act of 2021. Local education agencies (LEAs) do not begin receiving federal funds that flow through the state until after allocations are made by the federal government, assurances and certifications are signed and awards are made by the state, and reimbursement for expenditures is requested by the LEA. Because of this process, there is a lag between the time when the funds are appropriated and when LEAs record the amounts as revenues.

² Federal revenues received from the U.S. Department of Education-administered Elementary and Secondary School Emergency Relief (ESSER I) Fund authorized by the CARES Act. These amounts do not include ESSER Fund revenues authorized under the CRRSA Act or the ARP.

³ Federal revenues received from the U.S. Department of Education-administered Elementary and Secondary School Emergency Relief (ESSER II) Fund authorized by the CRRSA Act. These amounts do not include ESSER Fund revenues authorized under the CARES Act or the ARP.

⁴ Federal revenues received from the U.S. Department of Education-administered Elementary and Secondary School Emergency Relief (ARP ESSER) Fund authorized by the ARP. These amounts do not include ESSER Fund revenues authorized under the CARES Act or the CRRSA Act.

⁵ Federal revenues received from the U.S. Department of Education-administered Governor's Emergency Education Relief (GEER I) Fund authorized by the CARES Act. These amounts do not include GEER Fund revenues authorized under the CRRSA Act.

⁶ Federal revenues received from the U.S. Department of Education-administered Governor's Emergency Education Relief (GEER II) Fund authorized by the CRRSA Act. These amounts do not include GEER Fund revenues authorized under the CARES Act.

⁷ Federal revenues received from the U.S. Department of Treasury-administered Coronavirus Relief Fund (CRF) authorized by the CARES Act and extended under the CRRSA Act.

⁸ Federal revenues received from the U.S. Department of Treasury-administered Coronavirus State and Local Fiscal Recovery Funds (SLFRF) authorized by the ARP Act.

⁹ United States totals include the 50 states and the District of Columbia.

¹⁰ Local governments in Texas were allocated almost \$10.5 billion under the Coronavirus State and Local Fiscal Recovery Funds (SLFRF). About 250 local education agencies in Texas reported significant increases in federal revenues distributed through government entities such as cities, education service centers, and councils of government.

¹¹ Amounts reported were awarded under the Education Stabilization Fund and American Rescue Plan to the Outlying Areas to the State Educational Agency. These amounts include funds authorized under the CARES Act, CRRSA Act, and ARP.

¹² Amounts reported were awarded under the Education Stabilization Fund and American Rescue Plan to the Outlying Areas to the Governor's office. These amounts include funds authorized under the CARES Act, CRRSA Act, and ARP.

NOTE: The U.S. Department of Education publishes data on Education Stabilization Fund (ESF) grant funds that have been awarded to and expended by states or outlying areas and local education agencies. The data are available at <https://covid-relief-data.ed.gov/>. The data contained on the ESF Transparency Portal are reported by states on the Annual Performance Report (APR) for ESSER and GEER grants. For FY 21, the reporting period for the CARES Act annual report began on October 1, 2020, and runs through the end of the state fiscal year. National Public Education Financial Survey (NPEFS) data are reported by school fiscal year, which for many states is July 1, 2020, through June 30, 2021. The ESF Transparency Portal does not include revenues by source of fund, as is displayed in this table. The data available in the ESF Transparency Portal may differ from data in this table due to these differences in reporting periods and data item definitions.

† Not applicable.

‡ Reporting standards not met. At the national level, data were missing for more than 15 percent of state education agencies (SEAs) in the 50 states and the District of Columbia. At the state or jurisdiction level, the reported value did not meet NCES data quality standards and was suppressed.

¹ Includes expenditures paid from funds authorized by the Coronavirus Aid, Relief, and Economic Security (CARES) Act of 2020, the Coronavirus Response and Relief Supplemental Appropriations (CRRSA) Act of 2021, and the American Rescue Plan (ARP) of 2021.² Current expenditures include instruction, instruction-related, support services, and other elementary/secondary current expenditures, but exclude expenditures on capital outlay, other programs, and interest on long-term debt.³ Support services is an expenditure function divided into seven subfunctions: student support services, instructional staff support, general administration, school administration, operations and maintenance, student transportation, and other support services.⁴ Capital outlay includes expenditures on property and construction of facilities.⁵ United States totals include the 50 states and the District of Columbia.NOTE: The U.S. Department of Education publishes data on Education Stabilization Fund (ESF) grant funds that have been awarded to and expended by states or outlying areas and local education agencies. The data are available at <https://covid-relief-data.ed.gov/>. The data contained on the ESF Transparency Portal are reported by states on the Annual Performance Report (APR) for ESSER and GEER grants. For FY 21, the reporting period for the CARES Act annual report began on October 1, 2020, and runs through the end of the state fiscal year. NPEFS data are reported by school fiscal year, which for many states is July 1, 2020, through June 30, 2021. The ESF Transparency Portal reports all expenditures for grants from the ESF. On the National Public Education Financial Survey (NPEFS), SEAs report current expenditures and capital outlay, which are subsets of all expenditures. NPEFS expenditure variables include expenditures from all grants authorized by the CARES Act, CRRSA, and ARP. The funding sources that are included are specific to each state and are noted in the FY 21 NPEFS documentation available at <https://nces.ed.gov/ccd/files.asp>. The data available in the ESF Transparency Portal may differ from data in this table due to these differences in reporting periods and data item definitions.
