SELECTED CHARACTERISTICS OF PUBLIC AND PRIVATE
SCHOOL ADMINISTRATORS (PRINCIPALS): 1987-88

Introduction

This report on public and private school administrators presents data on personal characteristics, salary and benefits received, highest degree earned, and years of experience. The data were collected on the School Administrator Questionnaire, one of seven questionnaires comprising the 1987-88 Schools and Staffing Survey (SASS), a survey developed by the U.S. Department of Education's National Center for Education Statistics, and conducted by the U.S. Bureau of the Census. This report provides National estimates for all data, and State estimates for public school administrators' salary, highest degree earned, and years of experience.

The SASS was a mail survey which collected public and private sector data on the Nation's elementary and secondary teaching force, aspects of teacher supply and demand, teacher workplace conditions, characteristics of school administrators, and school policies and practices. The seven questionnaires of the SASS are as follows:

1. The Teacher Demand and Shortage Questionnaire for Public School Districts (LEA's).
2. The Teacher Demand and Shortage Questionnaire for Private Schools.
3. The School Administrator Questionnaire.
4. The Public School Questionnaire.
5. The Private School Questionnaire.
6. The Public School Teachers Questionnaire.
7. The Private School Teachers Questionnaire.

The survey methodology is described in the Technical Notes section which follows presentation of the tables.

Table 1.--Number of school administrators by selected characteristics: 1987-88

Characteristic	Public	Private
Total administrators	77,890	25,401
Sex		
Male	58,585	12,131
Female	19,118	13,243
Not reported	--	--
Race		
American Indian, Aleut, Eskimo	821	--
Asian or Pacific Islander	434	--
Black	6,696	771
White	69,048	24,056
Not reported	890	--
Ethnic origin		
Hispanic	2,483	629
Non-Hispanic	73,245	24,167
Not reported	2,162	604
Age		
Under 40	14,430	7,608
40 to 44	17,755	5,352
45 to 49	16,408	4,497
50 to 54	14,936	2,979
55 or over	13,891	4,703
Not reported	469	--
Region		
Northeast	13,854	6,299
Midwest	22,465	7,644
South	25,890	6,995
West	15,680	4,463

-- Too few sample cases (fewer than 30) for a reliable estimate.

NOTE: Details may not add to totals due to rounding or missing values in cells with too few sample cases, or item nonresponse.

NOTE: Cell entries may be underestimates due to item nonresponse (Not reported).

Technical Notes

Sample selection

Questionnaires were mailed to the administrators of all 9,317 public and 3,513 private schools in the school samples.¹ The public school sample was selected from the Quality Education Data (QED) file of public schools. All public schools in the file were stratified by the 50 States and the District of Columbia, and then by three grade levels (elementary, secondary, and combined). Within each stratum the schools were sorted by urbanicity, zip code (first two digits), highest grade in the school, and enrollment. For each stratum within each State, sample schools were selected by systematic (interval) sampling with probability proportional to the square root of the number of teachers within a school.

The private school sample was selected primarily from the QED file of private schools. To improve coverage, two additional steps were taken. The first step was to update the QED file with current lists of schools from 17 private school associations. All private schools on the QED file and the lists from the private school associations were then stratified by the 50 States and the District of Columbia. Within each State and the District of Columbia, schools were further stratified by three grade levels (elementary, secondary, and combined), and by thirteen affiliation groups. Within each stratum the schools were sorted by urbanicity, zip code (first two digits), highest grade in the school, and enrollment. Sample schools were then selected by systematic (interval) sampling within each stratum with probability proportional to the square root of the number of teachers. The second step was to include an area frame sample, contained in 75 Primary Sampling Units (PSU's), each PSU consisting of a county or group of counties. Within each PSU, an attempt was made to find all eligible (in scope) private schools. A telephone search was made, using such sources as yellow pages, Non-Roman Catholic religious institutions, local education agencies, chamber of commerce, local government offices, commercial milk companies, and commercial real estate offices. Roman Catholic religious institutions were not contacted because QED calls each Catholic diocese during its annual list update. The PSU's were stratified by Census geographic region: Northeast, Midwest, South, and West; Standard Metropolitan Statistical Area (SMSA) status, and private school enrollment. These PSU's were selected from the universe of 2,497 PSU's with probability proportional to the square root of the PSU population. All schools not on the QED file or the lists from the private school associations were eligible to

¹ The other SASS samples were as follows: 5594 public school districts, 56,242 public school teachers, and 11,529 private school teachers.

be selected for the area frame sample. Schools in the area frame that could be contacted were sampled with probability proportional to the square root of the number of teachers. A systematic equal probability sample was then drawn from the schools in the area frame that could not be contacted.

The School Administrator Questionnaire was mailed to the administrator of each sampled school in February 1988. A second questionnaire was mailed to all nonrespondents in March, and a telephone followup on nonrespondents was conducted during April, May, and June.

Questionnaire response rates

The weighted responses were calculated using the sampling weights. Weighted response rates for the School Administrator Questionnaire were 94.4 percent for public school administrators and 79.3 percent for private school administrators.

Item descriptions

The School Administrator Questionnaire is shown in the Appendix. Specific data items in the tables and the corresponding questionnaire items are as follows:

Data item	Questionnaire item
Sex	9
Race	10
Ethnic origin	11
Age	12
Highest degree earned	1a
Average years of experience	
As a principal	5a+5b
Other el/sec admin.	5c
Teaching	2a
Other el/sec	5d
Outside el/sec	5e
Average salary	7a
Length of work year	7b
Benefits received	8

Item response rates

Unweighted item response rates for items used in this analysis are as follows:

Questionnaire item	Response rate(%)	
	Public	Private
9	99.7	99.8
10	98.9	99.2
11	97.2	96.9
12	99.4	99.0
1a	100.0	100.0
5a	100.0	100.0
5b	98.6	98.3
5c	97.6	97.5
2a	99.7	98.3
5d	94.8	95.9
5e	94.8	96.1
7a	97.4	93.3
7b	99.5	98.6
8	99.5	98.3

Effects of item nonresponse and missing schools

There was no explicit imputation for item nonresponse and for a small number of schools which were found to be missing from the QED lists of public schools.

Not imputing for item nonresponse leads to a bias in the estimates. In tables 3, 4, 7, and 8, which present averages, the nature of this bias is unknown.

In tables 1, 2, 5, and 6, which present counts, the national estimate for public school administrators (77,890) is underestimated because of missing schools. The details for public school administrators are underestimated because of missing schools and item nonresponse, and the details for private school administrators are underestimated because of item nonresponse.

However, since the item response rates for items used in this analysis are all high (all items but those on salary had a response rate of at least 95 percent), bias in the estimates attributable to item nonresponse is not considered to be substantial.

Following the data collection, a comparison of SASS public school estimates with NCES' Public Elementary/Secondary School Universe Survey of the Common Core of Data (CCD) series revealed SASS estimates for some States that were considerably lower than CCD counts. Upon further examination it was discovered that the QED frame did not include all small Class 1 public school districts and that the QED definition of school varied somewhat from the CCD definition. Class 1 districts include only elementary schools, and

for Nebraska a comparison of the QED and CCD counts indicated there were about 275 of these districts, with an average of about 10.2 students per district. The small number of students per district suggests that these were, for the most part, one-school districts. Because of these missing schools the SASS national count of public school administrators and the count for Nebraska, in particular, are underestimated. As with the effects of nonimputation for item nonresponse, the effect of these missing schools on the nature of the bias for averages is unknown.

Large numbers of Class 1 districts were not found in other States. Therefore, much of the remaining discrepancies between SASS State estimates of public school counts and CCD State counts may be attributable to the difference between QED and CCD definitions of a school. This difference is discussed below in the section on Definitions.

Differences between administrator and school estimates

Estimates of the numbers of administrators shown in this report will differ somewhat from estimates of the numbers of schools. (Estimates of the numbers of schools will appear in subsequent reports.) These differences are attributable, largely, to small numbers of schools which reported not having an administrator.²

Standard errors

The estimates in these tables are based on samples and are subject to sampling variability. Standard errors were estimated using a balanced repeated replications procedure that incorporates the design features of this complex sample survey. The standard errors provide indications of the accuracy of each estimate. If all possible samples of the same size were surveyed under the same conditions, an interval of 1.96 standard errors below to 1.96 standard errors above a particular statistic would include the universe value in approximately 95 percent of the cases. Note, however, that the standard errors in the tables do not take into account the effects of biases due to item nonresponse, measurement error, data processing error, or other systematic error.

² State estimates of the numbers of schools which reported not having an administrator were calculated and added to the State estimates of the numbers of administrators to obtain a total for each State. Inspection of the data indicated that these State totals were comparable to the corresponding State estimates of the number of schools.

Definitions

QED definition of school

The QED generally defines a school in terms of "building" as opposed to "administrative unit". For example, in most instances the QED counts an elementary school and a secondary school housed in one building as one school. In those States which house more than one administrative unit in a building, the QED count of schools is lower than the State count of schools reported on NCES's Public Elementary/Secondary School Universe survey of the Common Core of Data (CCD) series, because the CCD definition of school is in terms of administrative unit. Since the SASS made use of the QED file (the latest version of the CCD universe file was not available at the time the school sample was drawn), there are a number of instances in which the SASS estimates for States are lower than the CCD counts. Those states for which the SASS estimates of the number of schools are considerably lower than the CCD counts are Nebraska (about 31 percent lower), North Dakota (about 30 percent lower), and South Dakota (about 28 percent lower).

Further constraints applied in defining public and private schools were as follows:

Public schools

- Instruction had to be provided to students in at least one of grades kindergarten to grade 12.

Private schools

- Instruction had to be provided to students in at least one of grades 1-12.
- Instruction could not be in a private home.
(If it could not be determined that instruction was not in a private home, the school had to have at least 10 students or more than one teacher.)

Class 1 school district

A school district that maintains only elementary grades under the direction of a single school board.

Dear Principal:

The Center for Education Statistics (CES) of the U.S. Department of Education requests your participation in the School Administrator Survey for the 1987-88 Schools and Staffing Survey. Your school is one of 9,300 public and 3,500 private schools across the Nation selected to be in the sample.

The Schools and Staffing Survey is an integrated set of surveys consisting of the Teacher Demand and Shortage Survey, the School and School Administrator Surveys, and the Teacher Survey. These surveys are revisions of previous CES surveys, designed to better measure critical aspects of teacher supply and demand, the composition of the administrator and teacher workforce, and the status of teaching and schooling generally. The purpose of the School Administrator Survey is to obtain information about the training, experience, and professional background of school principals.

The U.S. Bureau of the Census is conducting the surveys for the Center for Education Statistics by the authority of Section 406(b) of the General Education Provisions Act, as amended (20 USC 1221e). The data will be treated as confidential and will be reported only in statistical summaries that preclude the identification of any individual or school participating in the surveys.

We are conducting this survey with a sample of schools. While this minimizes overall response burden, the value of each individual survey response is greatly increased because it represents many other principals. I, therefore, encourage you to participate in this voluntary survey by completing this questionnaire and returning it within 2 weeks to the Bureau of the Census. A preaddressed envelope is enclosed for your convenience.

I thank you for your cooperation in this very important effort.

Sincerely,

Emerson J. Elliott
Director
Center for Education Statistics

Enclosure

Please correct any error in name
and address including
ZIP Code.

If this school does **NOT** have an administrator,
please mark (X) the box.

011

☐ School has no administrator

If you marked the box above, you do not need to complete this questionnaire. Please return it to the Bureau of the Census in the enclosed postage-paid envelope. Thank you for your cooperation.

INSTRUCTIONS

It is important that the questionnaire be completed by the school administrator (i.e., the principal or head), not by anyone else at the school.

If you have any questions, call the Bureau of the Census collect at (301) 763-2220.

If you are unsure about how to answer a question, please give the best answer you can and make a comment in the "Remarks" section.

Please return your completed questionnaire to the Bureau of the Census in the enclosed postage-paid envelope. Please return it within 2 weeks.

THANK YOU FOR TAKING PART IN THIS STUDY.

1a. Which of the following college degrees have you earned? (Mark all the degrees you have earned.)

b. What was your major field of study for each degree? (Use the code numbers at right.)

c. In what year did you receive each degree?
