

**National Postsecondary
Student Aid Study:
Estimates of Student
Financial Aid, 1992-93**

Data Series:
DR-NPSAS-1993

ACKNOWLEDGMENTS

Abt Associates, Inc. with Research Triangle Institute, and MPR Associates, Inc. under contract with the National Center for Education Statistics, conducted the 1993 National Postsecondary Student Aid Study (NPSAS). John Loft of Abt Associates provided project direction and management. A cadre of other staff too numerous to list worked long hours to produce the 1993 NPSAS.

With the help of over one thousand individuals at the postsecondary institutions who assisted more than 100 data collectors, the records of nearly 80,000 students were extracted. These institutional coordinators, financial aid administrators, and their staff were helpful, diligent, and productive. Without their assistance, the 1993 NPSAS would not exist.

The following OERI/NCES reviewers provided helpful comments for this publication: Nabeel Alsalam, Sal Corrallo, Sandra Garcia, and Paula R. Knepper. Reviewers from other federal offices and agencies also were helpful. They included David Bergeron, Office of Postsecondary Education, Sonia Conly, Treasury Department; Dan Goldenberg, Office of Policy and Planning; and Jay Noell, Congressional Budget Office. In addition, comments were provided by Fred Galloway, American Council on Education; Michael Nettles, University of Michigan; and Peter Syverson, Council of Graduate Schools.

Andrew G. Malizio, served as the NCES project officer who managed the study under the overall supervision of C. Dennis Carroll, Longitudinal Studies Group. Dennis Carroll and Larry G. Bobbitt developed the software system used to produce the estimates in this publication. Paul D. Planchon, Associate Commissioner at NCES, provided management and direction.

The 1993 NPSAS received support and advice from a varied constituency over the duration of the study. The National Center for Education Statistics is indebted to all these individuals who assisted NCES and ABT in the planning, design and implementation of the study.

INTRODUCTION

The National Postsecondary Student Aid Study (NPSAS) is a comprehensive study that examines how students and their families pay for postsecondary education, and other characteristics of students. It includes nationally representative samples of undergraduate, graduate, and first-professional students; students attending less-than-2-year, 2-year, 4-year, and doctoral-granting institutions; students who receive financial aid and those who do not receive aid. A sample of students' parents participate in NPSAS.

As a part of the 1993 NPSAS, information on more than 78,000 undergraduate and graduate students enrolled at any time during the 1992-93 school year was collected at about 1,100 postsecondary institutions. The sample represents students enrolled at any time between July 1, 1992 - June 30, 1993.

The estimates in this tabulation are based on analysis files containing more than 66,000 participating students. Information is based on institutional records, and computer assisted telephone interviews of students and telephone interviews with a subsample of their parents.

Appendix Table A.1 shows the weighted response rates. Estimates focus primarily on percentages of students receiving financial aid, and average amounts of specific types of financial aid received. Unless otherwise noted, all average amounts of aid described in the highlights and presented in the tables reflect the weighted means and are based on the recipients of that source of aid only.

ACCURACY OF THE ESTIMATES IN THIS TABULATION

The estimates in this tabulation are subject to sampling and nonsampling errors. Nonsampling errors are due to a number of sources, including but not limited to, nonresponse, inaccurate coding, misspecification of composite variables, and inaccurate imputations. Sampling errors exist in all sample-based data sets, including NPSAS. Estimates based on a sample may differ from those based on a different sample of the same underlying population. Thus, estimates of average aid amounts based on the NPSAS sample will probably differ from specific program amounts reported by the Department's program offices--which are typically based on a census.

The standard error is a measure of the precision of the estimate. In this tabulation, each estimate's standard error was calculated using Taylor residual procedures and can be produced using the 1993 NPSAS Data Analysis System table generation software. Appendix Tables B1-B8 provide readers with information about the standard errors for the estimated percentages and average amounts shown in Tables 1-8 for undergraduates. Standard errors for estimated percentages for graduate and first-professional students are in Tables 9-12. All differences reported in the Highlights were significant at the .05 level per set of comparisons, using the Bonferroni procedure

when appropriate. This assures both the individual comparison would have $p \leq .05$ and that when k comparisons were made within a family of possible tests, the significance level of the comparisons would sum to $p \leq .05$.

The procedure that computed the estimates in this tabulation required 30 or more unweighted cases. For those estimates with fewer than 30 unweighted cases, the cell was labeled as "low n." Readers are cautioned that "low n" should only be interpreted as "fewer than 30 cases were in the NPSAS analysis file to produce this estimate." That is, "low n" does not necessarily mean that a low number of students received the specific type of aid, or that the amount of aid received was low.

CAUTIONS AGAINST COMPARING THESE ESTIMATES TO PRIOR NPSAS ESTIMATES

Two design features of the 1993 NPSAS sample suggest that the estimates in this tabulation, while generally comparable to NPSAS:90, are not comparable to published estimates from the 1987 NPSAS. These design changes were made to the 1990 NPSAS to improve full-year estimates. The 1987, and 1990 NPSAS sampled students enrolled in the fall (October). However, the 1990 NPSAS also sampled students who were enrolled in summer (August), winter (February), and spring (June). In NPSAS:93, institutions were asked to provide one list (if possible), that represented students enrolled at any time during the 1992-93 year. In each NPSAS survey, those students who were initially sampled in the fall could have been enrolled for the full academic year.

The 1990 and 1993 NPSAS samples also included a small sample of students from Puerto Rico. Students from Puerto Rico were not included in the 1987 NPSAS. The final restricted data files and the public use 1993 NPSAS Data Analysis System software will allow users to produce estimates comparable to 1987 by selecting only students who were enrolled in the fall and exclude those sampled from Puerto Rico. These estimates will reflect full-year amounts of aid for students who were enrolled in the fall. Such estimates, however, will not reflect total expenditures as reported by the Department's specific Title IV program offices. This will be explained more fully in the forthcoming methodology report. Further, a subsequent report that controls for these design changes will focus on 1987-1993 (see below).

OTHER CAUTIONARY NOTES

The estimates for average amounts in this tabulation are for those who received the specified type of aid. For example, although dependent undergraduate students with family incomes of \$100,000 or more received an average federal loan award of \$3,300, less than 4 percent of such students received federal loans (see Table 5 and Table 6). Further, NCES recommends that readers not try to produce their own estimates such as the numbers of undergraduates enrolled in the fall who received any aid, federal aid, state aid, etc., by combining estimates in this tabulation with the Center's Integrated Postsecondary Education Data System (IPEDS) fall 1992 enrollment numbers. The IPEDS enrollment data are for fall

enrollment only. Additional information on the NPSAS:93 sample will be described in the forthcoming methodology report.

ADDITIONAL ESTIMATES

All estimates in this tabulation were produced using software developed by NCES. The software includes more than 325 variables and allows users to produce tables or correlation matrices for use in regression programs. Users can specify row and column variables to produce estimated means, percentages, standard errors, and weighted sample sizes. Estimates can be produced for specific subgroups--for example, aided, full-time, dependent students. To use the software, users should have (1) a computer capable of running MS-DOS applications with about 1 megabyte of space available on a hard disk, and (2) access to INTERNET compatible mail. To request a copy of the NCES 1993 NPSAS Data Analysis System, readers should first look for information on the Internet (GOPHER://GOPHER.ED.GOV:10000/11/SEARCH/DAS), or contact the NCES Longitudinal Studies Group; 555 New Jersey Avenue NW; Room 310; Washington, DC 20208-5652; or call (202) 219-1365.

NPSAS:93 REPORTS IN PROGRESS

Methodology Report for the National Postsecondary Student Aid Study, 1993. Describes the overall design, data collection procedures, and data files, including weighting and variance estimates for the 1993 NPSAS.

Undergraduate Financing of Postsecondary Education, 1992-93. Describes financial aid receipt and amounts in terms of federal, state, and institutional aid and grants, loans, and work aid.

Financing of Graduate and Professional Education, 1992-93. Describes financial aid receipt and amounts in terms of federal, state, institutional, and employer aid and fellowships, grants, loans, and work aid.

Profile of Undergraduates in U.S. Postsecondary Institutions, 1992-93. Describes undergraduates in terms of demographic and socioeconomic characteristics, academic preparation and progress, institution characteristics, and financial support.

Trends in Postsecondary Student Financial Aid, 1987-1993. Using 1987 and (fall) 1990 and 1993 NPSAS data, comparisons of federal, state, and institutional grants, loan, and work aid are planned. A separate chapter will compare 1989-90 and 1992-93 NPSAS fall and non-fall groups of students.

HIGHLIGHTS

All estimates presented in this tabulation are based on the 1993 National Postsecondary Student Aid Study (NPSAS). The National Postsecondary Student Aid Study is a comprehensive study designed to examine how students and their families pay for postsecondary education. It includes nationally representative samples of undergraduate, graduate, and first-professional students; students attending less-than-2-year, 2-year, 4-year, and doctoral-granting institutions. Students who receive financial aid as well as those who do not receive aid, and a sample of students' parents participate in NPSAS.

The estimates in this tabulation are based on an analysis file of more than 66,000 undergraduate and graduate students containing information from institution financial aid and admissions records, and student and parent telephone interviews. Students were enrolled at any time during the 1992-93 year. Unless otherwise noted, all average amounts of aid described in the highlights and presented in the tables are based on recipients of that source of aid. Highlights are presented separately for undergraduates and graduate and first-professional students.

AMONG THE 18.5 MILLION UNDERGRADUATES (INCLUDING FULL-TIME AND PART-TIME STUDENTS) ENROLLED DURING 1992-93:

- * About 40 percent (almost 7.7 million) received financial aid from some source, including federal or state governments, institutions, or other private organizations, or combinations of these sources (excluding aid from relatives); averaging about \$4,200 [Tables 1, 2].
- * About 1 of every 3 received some type of federal aid; about 2 of every 10 received federal grants [Tables 1, 5].
- * Percentages of students receiving financial aid varied considerably, depending on the type of institution. Percentages ranged from about 27 percent of the 8.2 million undergraduates at public 2-year institutions to 75 percent of the 830,000 enrolled at private, for-profit, less-than-2-year institutions [Table 1].
- * Average amounts also varied considerably, depending on the type of institution [Table 2].

- * Among the 2.2 million aided undergraduates enrolled at public 2-year institutions, the average amount of aid received was about \$2,200.
- * Among the 1.5 million aided undergraduates enrolled in public doctoral institutions, the average amount was about \$4,300.
- * Among the 1.1 million aided undergraduates enrolled in other public 4-year institutions, the average amount was about \$3,700.
- * Among the 600,000 aided students enrolled in private not-for-profit, doctoral-granting institutions, the average amount received was about \$8,800.
- * Among the 980,000 aided undergraduates enrolled in other private not-for-profit, 4-year institutions, the average amount received was about \$6,500.
- * For the one million aided students enrolled in private for-profit institutions, the average amount was \$4,200.
- * Overall, about 1 of every 3 undergraduates received some grant aid (including grants from federal and state governments, institutions, and/or employers). About 3 of every 4 dependent undergraduates from families with incomes less than \$10,000 received some grant aid, averaging about \$3,100 [Tables 3, 4].
- * Overall, about 11 percent of undergraduates in private 4-year, not-for-profit institutions received federal work-study aid, the average amount was about \$1,200; about 3 percent in public 4-year institutions received federal college work-study assistance, averaging about \$1,300 [Tables 5, 6].
- * Overall, nearly one of every four undergraduates received some non-federal aid--from either state, institutions, or employers, averaging about \$2,550 [Tables 7, 8].

AMONG THE 2.7 MILLION GRADUATE AND FIRST-PROFESSIONAL STUDENTS (INCLUDING FULL-TIME AND PART-TIME STUDENTS) ENROLLED DURING 1992-93:

- * About 4 of every 10 graduate/first-professional students received some financial aid from any source, including federal or state governments, institutions, or employers; averaging \$8,500.
- * Nearly 70 percent of those enrolled full-time/full-

year received aid, compared to about 20 percent of those enrolled part-time/part-year [Tables 9, 10].

- * About 1 of every 5 received some type of federal aid, averaging \$8,550; about 1 of every 5 received some institutional aid, averaging about \$5,800; 1 of every 16 received some employer assistance, averaging about \$2,400 [Tables 9, 10].
- * Percentages of graduate and first-professional students receiving financial aid varied considerably, depending on the type of degree program. For example, about one-third of the 1.6 million students enrolled in master's programs, averaging about \$6,500. About three-quarters of the nearly 300,000 students enrolled in first-professional programs (e.g., law school, medical school, dentistry) received financial aid, averaging more than \$14,500 [Table 9].
- * Overall, about 6 of every 10 first-professional students received some loan aid, averaging about \$13,500 [Tables 11, 12].
- * For the 150,000 aided doctoral students the average total aid amount was nearly \$10,800 [Table 10].
- * Overall, about 1 of every 4 graduate students received some grant aid (including grants from federal and state governments, institutions, and/or employers), averaging about \$3,800 [Tables 11, 12].
- * Overall, 1 of every 5 doctoral students compared to about 1 of every 16 Master's degree students received some type of assistantship. Doctoral students who received assistantships, got an average of \$9,400, compared to an average of about \$6,700 for students pursuing a Master's degree [Table 11, 12].

Table A.1--Response rates for students included in the analysis file, by

selected institution and student characteristics for NPSAS:93

	UNWEIGHTED RATE	WEIGHTED RATE	EFFECTIVE RATE
All students	83.4%	79.5%	85.0%
Institution type			
Less-than-2-year	76.7%	80.0%	86.0%
2-year	75.7%	73.2%	79.9%
4-year, non-PhD granting	83.7%	80.8%	85.6%
PhD granting	86.2%	84.9%	89.1%
Institution control			
Public	83.2%	78.4%	84.2%
Private, not-for-profit	84.3%	83.2%	87.7%
Private, for-profit	82.2%	82.4%	87.0%
Level and Control			
Public, less-than-2-year	65.3%	78.9%	85.0%
Public, 2-year	73.6%	72.5%	79.3%
Public, 4-year, non-PhD-granting	79.7%	76.7%	81.6%
Public, PhD granting	86.7%	85.5%	89.7%
Private nfp, less-than-4-year	72.5%	78.5%	84.2%
Private nfp, 4-yr, non-PhD-granting	85.4%	83.5%	88.1%
Private nfp, PhD-granting	85.4%	83.5%	87.9%
Private for-profit, less-than-2-yr	81.2%	81.4%	87.1%
Private for-profit, 2-year or more	85.6%	83.7%	87.0%
Student Level			
Undergraduate	82.6%	78.5%	84.3%
Graduate	86.4%	85.4%	89.5%
First-professional	86.8%	87.4%	90.4%

Note: The overall weighted response rate for the student telephone interviews was 67.8 percent. Additional information on response rates will be published in the Undergraduate Financing of Postsecondary Education report, scheduled for release in spring 1995.

FOOTNOTE: The effective response rate is $R = R1 + (1-R1)R2$, where R1 is the Phase 1 response rate and R2 is the response rate achieved among the students selected for the nonresponse follow-up subsample.

DESCRIPTION OF VARIABLES USED IN THIS TABULATION

(The acronym CADE stands for Computer Assisted Data Entry and refers to the student information obtained from institutional records; CATI stands for Computer Assisted Telephone Interviews)

The names that appear in UPPERCASE are the variable names on the DATA ANALYSIS SYSTEM, and are provided for readers who may wish to use similar variables in producing their own tables.

ROW VARIABLES USED IN THIS TABULATION:

INCOME Family income: Income and dependency level

Dependency status and categorical income level. Equal to DEPINL for dependent students and INDEPINL for independent students.

Sources: N93 CADE, N93 Student/parent CATI, Pell file

SECTOR_B Institution: Institutional type (level and control)
[shown in tabulation as Institutional type]

Institution type by level and control, combined. Institution level concerns the institution's highest offering (length of program and type of certificate, degree or award), and control concerns the source of revenue and control of operations.

Sources: IPEDS-IC (1992)

Label shown in table: Stands for:

Public, < 2-year	Public, less-than-2-year
Public, 2-year	Public, 2-3 year (2 year but less than 4-yr)
Public, 4-year no PhD	Public, 4-year, non-doctorate-granting
Public, 4-year PhD	Public, 4-year, doctorate-granting

Private, nfp, < 4-year	Private, not-for-profit, less-than-4-year
Private, nfp, 4-year PhD	Private, not-for-profit, doctorate-granting
Private, nfp, 4-year no PhD	Private, not-for-profit, non-doctorate

Private, for-profit, < 2-year	Private, for-profit, less-than-2-year
Private, for-profit, 2-yr+	Private, for-profit, 2-years-or-more

Note: Doctorate-granting also includes those institutions that award first-professional degrees.

ATTNSTAT Attendance pattern

Attendance pattern refers to the student's full or part time attendance while enrolled, as defined by the institution. Students were considered to have enrolled for a full year if they were enrolled at least 9 months between July, 1992 and June, 1993. Months did not have to be contiguous, and students did not have to be enrolled for a

full month in order to be considered enrolled for that month. For all students, CADE (institution-reported) data was used to determine the enrollment and attendance status for each month. In cases where CADE data was not available for a particular month, CATI (student-reported) data was substituted, if available.

Specific categories of ATTNSTAT:

Students who were enrolled at some point in the 12 months between July, 1992 and June, 1993, were classified as follows:

Students were considered to have enrolled for a full year if they were enrolled full time for at least 9 months out of the 12.

Students enrolled less than 9 months and attending full time all of those months were considered full time, part year.

Students were considered enrolled part time full year if they were enrolled at least 9 months, either part time or a combination of part time and full time. Students were classified as part time part year if they could not be considered either full time full year or part time full year.

Sources: N93 CADE, N93 Student CATI

[Note: values (1+2) and (4+5) were combined in this tabulation.

Code	Percent	Category label
1	31.7	Full time/full year: 1 institution
2	1.1	FT/FY: more than 1 institution
3	13.3	Full Time/Part Year
4	23.9	Part time/full year: 1 institution
5	1.4	PT/FY: more than 1 institution
6	27.6	Part time/part year
-1	1.0	{Missing, legit skip, etc.}

 COLUMN VARIABLES USED IN THIS TABULATION:

TOTAID AidTot: Total aid amount

[shown in tabulation as "ANY" or "ALL" in Tables 1-4, 9-12]

Total amount of all financial aid received. TOTAID is a function of other award variables in the following manner:

type federal(ex VA/DOD)+ state+ instion + other(w/ VADOD)= total

Grant: TFEDGRT STGTAMT INGRTAMT OTHGTAMT TOTGRT

Loans: TFEDLN (exc PLUS) STLNAMT INLNAMT OTHLNAMT TOTLOAN

Work : TFEDWRK STWKAMT INSTCWS OTHWKAMT TOTWKST

Other: TFEDOTHR(inc PLUS)STOTHAMT INOTHAMT OTHFDAMT(VaDod) TOTOTHR

Total TFEDAID(ex VA/DOD) STATEAMT INSTAMT OTHERAMT(VADOD) TOTAID

Note that CADE (institution-reported) and CATI (student-reported) data did not always contain identical information, although differences were generally negligible. By design, CATI data did not contain information on the federal programs ICL, EFN, FADHPS, NSL, state vocational rehabilitation, did not ask specifically about SSIG, or had less specific information about tuition waivers, but was specific information about institution work-study and grant amounts, and had a more abbreviated list of veteran's benefits, but more specific lists of sources for grants that could not be classified as federal, state, or institutional. Note that PLUS loans are included in TFEDOTHR rather than in TFEDLN.

Note also that veteran's benefits (VADOD) are included in OTHDFAMT("other other" financial aid), rather than as part of any federal aid totals. Please see descriptions of the variables PLUSAMT and VADODAMT for further explanation of the use of these variables.

CATI data were used when students had no viable CADE (institution-reported) data, or when they had aid from a second institution; in general, it was assumed that the institution's records would be more accurate than the student's memory. Whenever possible, information about award amounts was taken from the institution and loaded into the computerized questionnaires administered to the students. Students were then asked to verify these amounts, and to provide the correct amount if they disagreed with the amount provided by the institution.

Sources: N93 CADE, N93 Student CATI

TFEDAID2 Total federal aid amount (including VA/DOD)
[shown in tabulation as "Federal" in Tables 1,2,9,10, and
"any federal aid" in Tables 5,6]

Total amount of federal financial aid, including VA/DOD. Equal to the sum of TFEDAID and VADODAMT. Only CADE (institution-reported) data contained information on ICL, EFN, FADHPS, and NSL. In addition, the CADE data contained a longer list of specific veterans programs. CATI (student-reported) data contained information about VEAP, Survivors and Dependents, and the general category of "veterans benefits".

INSTAMT Institutional total aid amount
[shown in tabulation as "Institution" in Tables 1-2, 9-10]

Total institutional amount. Equal to the sum of INGRTAMT (institution grant amount), INLNAMT (institution loan amount), INSTCWS (institution-sponsored college work-study), and INOTHAMT (all other institutional amounts).
Note that CADE (institution-reported) and CATI (student-reported) data did not always contain identical information. See descriptions of component variables for more information.

Sources: N93 CADE, N93 Student CATI

STATEAMT Total state amount
[shown in tabulation as "State" in Tables 1-2, 9-10]

Total amount of state awards. Equal to the sum of STGTAMT (total amount of all state grants), STLNAMT (total amount of all state loans), STWKAMT (total amount of all state-sponsored work-study), and STOTHAMT (total amount of all other state financial aid).
Includes amounts awarded for vocational rehabilitation, state work study, SSIG grants, and all other state awards. Note that STOTHAMT is based on CADE data alone, and that CATI data did not have information on state-sponsored vocational rehabilitation and did

not have information specifically about SSIG. CATI data were used when students had no viable CADE data, or when the student had aid from a second institution.

Sources: N93 CADE, N93 Student CATI

TOTGRT Total grant amount
[shown in tabulation as "Grants" in Tables 3-4, 11-12]

Total amount of all grants: federal, state, institutional, and other. Equal to sum of TFEDGRT (total of all federal grants), STGTAMT (total of all state grants), INGTAMT (total of all institutional grants), and OTHGTAMT ("other" grants that could not be classified as federal, state or institutional).

Note that CADE (institution-reported) and CATI (student-reported) data did not always contain identical information. See descriptions of component variables for more information. CATI data were used when students had no viable CADE data, or when they had aid from a second institution.

Sources: N93 CADE, N93 Student CATI, Pell file

TOTLOAN AidTot: Total loan amount (except PLUS)
[shown in tabulation as "Loans" in Tables 3-4, 11-12]

Total amount of all loans: federal, state, and institutional. Equal to the sum of TFEDLN (federal loan amount), STLNAMT (state loan amount), INLNAMT (institution loan amount) and OTHLNAMT (other loan amount). Does not include PLUS loans, although TOTLOAN2 (total all loans, including PLUS) does.

Note that CADE (institution-reported) and CATI (student-reported) data did not always contain identical information, although differences were generally negligible. See descriptions of component variables for more information. CATI data were used when students had no viable CADE data, or when they had aid from a second institution.

TOTWKST Total work-study amount
[shown in tabulation as "Work-study" in Tables 3-4]

Total amount of all work study awards. Equal to the sum of TFEDWRK (total federal work-study amount), STWKAMT (total state work-study amount), INSTCWS (total institution work-study amount), OTHWKAMT (total other work-study amount).

Research assistantships and teaching assistantships are included in INOTHAMT ("other" institutional aid amounts).

Sources: N93 CADE, N93 Student CATI

TFEDGRT Total federal grant amount
[shown as "Federal grants" in Tables 5-6]

Total amount of federal grants, including PELL (PELLAMT), SEOG (Supplemental Educational Opportunity Grants-SEOGAMT), EFN, FADHPS,

and other federal grant/scholarships or fellowship/traineeships, but not including veteran's benefits. Only CADE (institution-reported) data contained information on EFN and FADHPS. CATI (student-reported) data was used when students had no viable CADE data, or when the student had aid from a second institution.

Sources: N93 CADE, N93 Student CATI, Pell file

TFEDLN Total federal loan amount (except PLUS)
[shown as "Federal loans" in Tables 3-4, 11-12]

Total amount of federal loans, excluding PLUS. Sum of T4AMT1 (includes: Perkins, Stafford, SLS, income contingent), HEAL loan, HPSL loan, NSL loan, and any other federal loans. Only CADE (institution-reported) data contained information on income contingent loans and NSL. CATI (student-reported) data were used when students had no viable CADE data, or when the student had aid from a second institution.

TFEDLN is included in the estimate of TFEDAID (total federal aid), along with TFEDWRK (federal work-study amount), TFEDGRT (fed grant amount), and TFEDOTHR (other fed amount). TFEDLN is also included in the estimate of TOTLOAN (total loan amount), along with STLNAMT (state loan amount), INLNAMT institution loan amount), and OTHLNAMT (other loan amount).

CWSPERND Federal work-study amount earned
[shown as "Federal work-study" in Tables 5-6]

Amount of federal college work study. College work study is a campus-based (administered by financial aid department at each institution) program. Jobs can be on campus, usually for the school, or off campus. The number of hours a student works is set by the school. Pay depends on the nature of the job and the skills the student has. As with other campus-based programs, students are eligible even if they attend school less than half time.

TNFEDAID Total non-federal aid amount
[shown as "Non-federal aid" in Tables 7-8]

Total amount of non-federal aid. Does not include VA/DOD (veteran's benefits - see description for VADODAMT). Equal to TOTAID (total amount, all aid) minus TFEDAID (total amount of federal aid, excluding VA/DOD), minus VADODAMT (total amount of veteran's benefits).

TNFEDGRT Non-federal grants amount
[shown as "Non-federal grants" in Tables 7-8]

Total amount of non-federal grants. Equal to TOTGRT (total amount of all grants), minus TFEDGRT (total amount of all federal grants).

TNFEDLN Non-federal loans amount
[shown as "Non-federal loans" in Tables 7-8]

Total amount of non-federal loans. Does not include PLUS loans. Equal to TOTLOAN2 (total amount of all loans, including PLUS loans), minus TFEDLN2 (total amount of federal loans, including PLUS loans). Also equal to TOTLOAN (total amount of all loans, excluding PLUS loans), minus TFEDLN (total amount of federal loans, excluding PLUS).
