GLOSSARY

INTEGRATED POSTSECONDARY EDUCATION DATA SYSTEM

Background

This glossary includes terms used in the Integrated Postsecondary Education Data System (IPEDS). IPEDS is the core postsecondary education data collection program in the U.S. Department of Education's National Center for Education Statistics (NCES). It was designed to help NCES meet its mandate to report full and complete statistics on the condition of postsecondary education in the United States. It is a single, comprehensive data collection system developed to encompass all institutions and organizations whose primary purpose is to provide postsecondary education. The IPEDS system is built around a series of interrelated surveys to collect institution-level data in such areas as enrollment, program completions, faculty, staff, finance, and libraries.

IPEDS supersedes the Higher Education General Information Survey (HEGIS), a similar set of surveys that collected data from 1966-86 from a more
limited universe of approximately 3,400 institutions that were accredited at the college level by an association recognized by the Secretary, U.S. Department of Education. The transition to IPEDS expanded the universe to include all institutions whose primary purpose is the provision of postsecondary education. IPEDS currently includes approximately 11,000 such institutions.

IPEDS uses a consistent set of common data elements which apply to all providers of postsecondary education. IPEDS also has sets of unique data elements which are applicable only to particular types of postsecondary education providers. The creation of unique sets of data elements required multiple versions of several of the IPEDS surveys. Table 1 is a key to the various IPEDS survey forms that institutions are asked to complete.

IPEDS Survey Components

The first IPEDS surveys were mailed to institutions in 1986, and the program has been operating on an annual basis since that time. The IPEDS program currently collects information from more than 11,000 postsecondary institutions using one or more of 9 survey instruments. A brief description of each of the component surveys follows:

Institutional Characteristics (IC)
Cycle: Annual

Data Elements: Address; congressional district; county; telephone number; room and board charges; tuition and required fees; control or affiliation; calendar system; levels of awards offered; types of programs; and accreditation. In addition, the IC survey collects the instructional activity and unduplicated headcount data, which are needed to compute a standardized, full-time equivalent (FTE) enrollment statistic for the entire academic year. The FTE measure is useful for gauging the size of the educational enterprise at the institution.

Fall Enrollment: EF

Cycle: Annual

Data Elements: Full- and part-time enrollments by level (undergraduate, first-professional, and graduate), and by race/ethnicity and sex of student. Beginning in 1990, racial/ethnic data were collected annually. (Prior to 1990, race/ethnicity data were collected biennially in even-numbered years.) Age distributions are collected in odd-numbered years by student level; data on state of residence of first-time freshmen (first-year students) are collected in even-numbered years. Four-year
institutions are also required to complete enrollment data by level, race/ethnicity and sex for 11 selected fields of study in even-numbered years for the Office for Civil Rights.

Fall Enrollment in Occupationally Specific Programs: EP

Cycle: Biennial (odd-numbered years)

Data Elements: Data on numbers of students enrolled in occupationally specific programs at the subbaccalaureate level, by race/ethnicity and sex of student, and by six-digit Classification of Instructional Program (CIP) code. Total unduplicated count of students enrolled in these programs (new in 1995).

Completions: C

Cycle: Annual

Data Elements: Degree completions by level (associate's, bachelor's, master's, doctor's, and first-professional), race/ethnicity and sex of recipient, and by 6-digit CIP code. Other formal awards based on duration of the program, also by race/ethnicity and sex of recipient and 6-digit CIP. Completion data by race/ethnicity at the 2-digit CIP level became an
annual collection in 1990; beginning in 1995, race/ethnicity is collected at the 6-digit CIP level.

Financial Statistics:  F

Cycle: Annual
Data Elements: Current fund revenues by source (e.g., tuition and fees, government, private gifts); current fund expenditures by function (e.g., instruction, research, plant maintenance and operation); physical plant assets and indebtedness; and endowment investments.

Salaries, Tenure and Fringe Benefits of Full-Time Instructional Faculty:  SA

Cycle: Annual
Data Elements: Number of full-time instructional faculty by rank, sex, tenure status, and length of contract; total salary outlay; and fringe benefits and number of full-time instructional faculty covered by these benefits. The survey became annual in 1990.

Fall Staff:  S
Cycle: Biennial (odd-numbered years)

Data Elements: Number of full-time faculty by racial/ethnic category, sex, contract length, and salary class intervals; Number of other persons employed full time by racial/ethnic category, primary occupational activity and salary class intervals; part-time employees by primary occupational activity, racial/ethnic category and sex; tenure of full-time faculty by academic rank and new hires by primary occupational activity, both by racial/ethnic category and sex.

Academic Libraries: L

Cycle: Biennial (even-numbered years)

Data Elements: Number of libraries and branches; library staff in FTE's; library operating expenditures by category including salaries and fringe benefits; book and media collections; library services (by fiscal year and in a typical week); and electronic services.

Consolidated Form: CN

Cycle: Annual

Data Elements: Enrollments and program completions by race/
ethnicity and sex; finance data; and either fall staff or libraries. Collected from all institutions eligible for Title IV programs, that do not complete the full package of IPEDS surveys described above.

The Institutional Characteristics survey is used to define the IPEDS universe of postsecondary institutions, and is intended to be completed by or for all currently-operating postsecondary institutions. The IC data provide the basis for assigning the institution to a specific sector, which, in conjunction with its eligibility for Title IV funding, determines the selection and distribution of other IPEDS surveys forms and the specific version of each survey appropriate to the institution. Several of the surveys include different versions of the questionnaire tailored to specific sectors. This is intended to prevent, for example, a request for enrollment data on graduate students from institutions with less-than-four-year programs. The pattern of IPEDS survey distribution is indicated in the table that follows.

Who is included in IPEDS

* All institutions whose primary purpose is the provision of
postsecondary education

* All branches of colleges, universities, and other institutions, as long as the branch offers a full program of study (not just courses)

* Free-standing medical schools, as well as schools of nursing, schools of radiology, etc., within hospitals

* Schools offering occupational and vocational training with the intent of preparing students for work (e.g., a modeling school training for professional modeling--not just a charm school)

Who is not included in IPEDS

* Schools not open to the general public (i.e., training sites at prisons, military installations, corporations)

* Hospitals offering internships or residency programs only; or hospitals that only offer training as part of a medical school program at an institution of higher education

* Organizational entities providing only noncredit continuing
education (CEUs)

* Schools whose only purpose is to prepare students to take a particular test, such as the CPA examination or the Bar exams

* Branch campuses of U.S. institutions in foreign countries

Data Uses

IPEDS surveys provide the data for analyzing and reporting information such as trends in enrollment and degree completions by sex and race/ethnicity, patterns of expenditures and revenues of institutions, patterns of student costs, faculty and staff information, and types and numbers of institutions. The data are used by NCES for annual reports on the condition of postsecondary education and for statistical digests; IPEDS also provides the frame for sampling postsecondary institutions. Federal program staff use IPEDS survey data to address various policy issues. Policymakers at the state level use IPEDS data for planning purposes and comparative analysis. Institutional staff use the data for peer analysis. In addition, many requests for information based on IPEDS and other postsecondary programs are received by NCES each year from federal agencies and officials, state agencies and officials, education associations, individual institutions, the media, and
the general public. The requests cover a broad range of data uses, educational issues, and public concerns.

NCES also encourages the use of IPEDS data and data sets in institutional research, at state and regional levels for policy analysis and planning, and by the academic research community. Students may access the institutional characteristics data, including tuition and fees and room and board charges, through several of the Career Information Delivery Systems (CIDS) networks, which provide information to over 5 million potential students each year.

Extensive statistical tables published in regular NCES reports provide access to the most frequently-used summary statistics. IPEDS data sets are available on computer tape, diskette, CD-ROM, and via INTERNET. The data are distributed to state higher education agencies and other distribution centers on an annual basis. Increasingly, NCES (through the National Data Resource Center), as well as other organizations and private vendors, provide special computer runs or more limited IPEDS data sets, some for use on microcomputers. These distribution networks and options are making IPEDS data more accessible and usable to increasing numbers of users and potential users.

Statutory Requirements for Reporting IPEDS Data
General Mandate

IPEDS is conducted by NCES as part of the Center's Congressional mandate under the National Education Statistics Act of 1994 (P.L. 103-382, Sec. 404(a)) which state that "The duties of the Center are to collect, analyze, and disseminate statistics and other information related to education in the United States and in other nations, including--

* collecting, acquiring, compiling (where appropriate, on a state by state basis), and disseminating full and complete statistics on the condition and progress of education, at the pre-school, elementary, secondary, and postsecondary levels in the United States, ...;

* conducting and publishing reports and analyses of the meaning and significance of such statistics;

* collecting, analyzing, cross-tabulating, and reporting, to the extent feasible, so as to provide information by gender, race, ...; and

* assisting public and private educational agencies, organizations, and institutions in improving and automating statistical and data collection activities..."
Vocational Education Data

IPEDS responds to certain of the requirements pursuant to Section 421(a)(1) of the Carl D. Perkins Vocational Education Act. The data related to vocational students, programs, program completions, and program enrollment are collected from postsecondary institutions known to provide occupationally specific vocation education. (EF) (EP) (C) (CN)

Data on Race/Ethnicity and Gender of Students

The collection and reporting of racial/ethnic data on students and completers are mandatory for all institutions which receive, are applicants for, or expect to be applicants for Federal financial assistance as defined in the Department of Education (ED) regulations implementing Title VI of the Civil Rights Act of 1964 (34 CFR 100.13), or defined in any ED regulation implementing Title IX of the Education Amendments of 1972. The Collection of racial/ethnic data in vocational programs is mandated by Section 421(a)(1) of the Carl D. Perkins Vocational Education Act.

Fall Staff Data
The collection and reporting of racial/ethnic data on the Fall Staff (S) survey are mandatory for all institutions which receive, are applicants for, or expect to be applicants for Federal financial assistance as defined in the Department of Education (ED) regulations implementing Title VI of the Civil Rights Act of 1964 (34 CFR 100.13). The collection of data are also mandated by Public Law 88-352, Title VII of the Civil Rights Act of 1964, as amended by the Equal Employment Opportunity Act of 1972 (29 CFR 1602, subparts O, P, and Q).

Library Data

Mandatory Reporting for Institutions with Program Participation Agreements

Section 490 of the Higher Education Amendments of 1992 (P.L. 102-325) requires that "the institutions will complete surveys conducted as part of the Integrated Postsecondary Education Data System (IPEDS)...in a timely
manner and to the satisfaction of the Secretary”. That is, the IPEDS surveys
are now mandatory for any institutions which participate in or are applicants
for participation in any Federal financial assistance program authorized by
Title IV of the Higher Education Act of 1965, as amended (20 USC 1094(a)(17)).
