The National Center for Education Statistics (NCES) is the primary federal entity for collecting, analyzing, and reporting data related to education in the United States and other nations. It fulfills a congressional mandate to collect, collate, analyze, and report full and complete statistics on the condition of education in the United States; conduct and publish reports and specialized analyses of the meaning and significance of such statistics; assist state and local education agencies in improving their statistical systems; and review and report on education activities in foreign countries.

NCES activities are designed to address high priority education data needs; provide consistent, reliable, complete, and accurate indicators of education status and trends; and report timely, useful, and high quality data to the U.S. Department of Education, the Congress, the states, other education policymakers, practitioners, data users, and the general public.

We strive to make our products available in a variety of formats and in language that is appropriate to a variety of audiences. You, as our customer, are the best judge of our success in communicating information effectively. If you have any comments or suggestions about this or any other NCES product or report, we would like to hear from you. Please direct your comments to:

Foreword

Each year a large number of written documents are generated by NCES staff and individuals commissioned by NCES which provide preliminary analyses of survey results and address technical, methodological, and evaluation issues. Even though they are not formally published, these documents reflect a tremendous amount of unique expertise, knowledge, and experience.

The Working Paper Series was created in order to preserve the information contained in these documents and to promote the sharing of valuable work experience and knowledge. However, these documents were prepared under different formats and did not undergo vigorous NCES publication review and editing prior to their inclusion in the series. Consequently, we encourage users of the series to consult the individual authors for citations.

Overview of the 1995 National Household Education Survey (NHES:95)

The NHES:95 is designed to cover two topical components: **Early Childhood Program Participation (ECPP)** and **Adult Education (AE)**. Each of these components is related to one of the President’s and Governors’ National Education Goals. The ECPP component addresses issues of importance to Goal 1, "By the year 2000, all children in America will start school ready to learn." The AE component is associated with Goal 6, which states that "By the year 2000, every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship." ECPP and AE were also addressed in a previous administration of the NHES in 1991. Based on that experience and on the recommendations of experts in the relevant fields, modifications to the components were made for the 1995 administration.

The NHES:95 is a cross-sectional telephone survey of households with data collection occurring in January through April of 1995. Households were sampled using list-assisted random digit dialing methods. About 45,500 households were screened to identify eligible respondents.

**Target Populations and Sample Sizes**

The **ECPP component** includes all children from birth through 3rd grade, up to age 10 (as of December 31, 1994). The parent or guardian who knows the most about the child’s care and education were interviewed. Typically, the respondents to the ECPP interview were the mothers of the sampled children. Up to two children in each household were selected.

For the **AE component**, interviews were conducted with persons who were age 16 and older and not enrolled in elementary or secondary school. Adults who had not finished high school and persons identified as adult education participants at the screening stage were oversampled. In most households, only one adult was interviewed; two adults were sampled if one or more adults in the household were AE participants who had not completed high school. In order to examine methodological issues associated with the measurement of adult education participation, a brief interview replicating the NHES:91 items determining participation status was also conducted with a special sample of adults, called the **splice sample**.

Numbers of completed interviews for each component of the NHES:95 are shown in table 1.

Content of the NHES:95 Early Childhood Program Participation (ECPP) Component

The ECPP component focuses on children’s participation in a range of care arrangements and program settings. It addresses nonparental care, that is care by persons other than the child’s own parents or guardians. The ECPP interview contains three major “paths” or sets of questions that are appropriate to the three populations of interest: infants/toddlers (children age 0 to 2), preschoolers (those children age 3 and older who are not yet enrolled in kindergarten), and kindergartners and primary school students through third grade. While some items are different for kindergartners and primary students, their interview paths are largely the same.

Content of the NHES:95 Adult Education (AE) Component

The NHES:95 AE component addresses participation in a wide variety of educational activities. These include programs to improve basic skills and obtain a high school equivalency certificate, English as a Second Language (ESL) courses, credential programs for certificates or degrees, apprenticeships, courses related to work, other formal structured courses taken for any reason, and computer-only or video-only instruction on the job. This broad view of adult education is designed to provide a comprehensive picture of the extent to which adults in the United States are participating in a wide range of educational activities. Within these types of education, participants were asked about topics such as the amount of time spent in programs or courses, costs associated with participation, employer support of participation, and motivations for taking the courses or programs.

NOTE: Item H1 allowed interviewers to: 1) correct the location and the number of days and hours for all arrangements, as well as correct the type of relative caregiver, whether an arrangement takes place before or after school, and whether a Head Start program is for a full or part day; 2) identify any duplicate arrangements so that one could be deleted; and 3) add arrangements that should have been reported earlier. If another arrangement was added, the CATI system cycled through the appropriate set of questions (e.g., relative, nonrelative, center) to collect relevant items.

If $ECPATH = K$ or $S$, ask M12.
If $ECPATH = I$, $N$ and $F1 = 1$ or $G1 = 1$ (child attends Head Start or a day care center, nursery school, or preschool), ask M12.
Else, go to LFINTRO.

NOTE: The HDSERV variables at item M11 indicate whether center-based programs reported for children with disabilities provide services. Since a maximum of three centers were reported for any child, there are three HDSERV variables on the file. HDSERV1 indicates whether the first-reported center provides services (1=yes, 2=no); HDSERV2 indicates whether the second-reported center (if any) provides services; and HDSERV3 indicates whether the third-reported center (if any) provides services.
M12. [ASK IF M9 = 1 AND FOR EACH ARRANGEMENT IN M11.]
Do all of the children in (CHILD’S) (class at school/room or group at) (the Head Start program/the program/ARRANGEMENT#) have disabling conditions, or is (he/she) in a mixed (class/group) with some children who have disabilities and some who don’t?
