Appendix A
Accrediting Agencies and Associations Recognized
By the Secretary, U.S. Department of Education

The Secretary of Education is required by statute to publish a list of nationally recognized accrediting agencies and associations which the Secretary determines to be reliable authorities as to the quality of training offered by educational institutions and programs. The National Advisory Committee on Accreditation and Institutional Eligibility assists the Secretary in determining which accrediting bodies should be listed. Accrediting bodies that achieve recognition are reviewed at least every 4 years thereafter.

The commissions of the regional associations and the national institutional and specialized accrediting agencies, which are recognized by the Secretary, have no legal control over educational institutions or programs. They promulgate standards of quality or criteria of institutional excellence and approve or admit to membership those institutions that meet the standards or criteria.

I. Regional Institutional Accrediting Associations

The regional associations recognized by the Secretary of Education appear in the following listing. Regional accreditation applies to the entire institution and indicates that each of its parts is contributing to the achievement of an institution's objectives, although not necessarily all on the same level of quality.

All regional accreditations listed in the Directory are self-reported by the institution and have not been verified by NCES, so the prospective student should verify accreditations of importance to him or her in the selection of a school by contacting the accrediting agencies. Appendix B provides the addresses and telephone numbers of the accrediting agencies for this purpose.

I. National Institutional and Specialized Accrediting Agencies

The national institutional and specialized accrediting agencies recognized by the Secretary of Education, and their scope of recognition, appear in the following listing. Institutional accreditation normally applies to an entire institution, indicating that each of its parts is contributing to the achievement of an institution’s objectives, although not necessarily all on the same level of quality. Some national accrediting agencies perform institutional accreditation.

Specialized accreditation normally applies to evaluation of programs, departments, or schools which usually are parts of a total collegiate or other Postsecondary institution. The unit accredited may be as large as a college or school within a university or as small as a curriculum within a discipline. Most of the specialized accrediting agencies review units within a postsecondary institution, which is accredited by one of the regional accrediting commissions. However, certain of the specialized accrediting agencies do accredit professional schools and other specialized or vocational or other postsecondary institutions which are free-standing in their operations. Thus, a “specialized” or “programmatic” accrediting agency may also function in the capacity of an “institutional” accrediting agency. In addition, a number of specialized accrediting agencies accredit educational programs within non-educational settings, such as hospitals.

All national institutional and specialized accreditations listed in the Directory are self-reported by the institution and have not been verified by NCES. The prospective student should verify accreditations of importance to him or her in the selection of a school by contacting the accrediting agencies. Appendix B provides the addresses and telephone numbers of the accrediting agencies for this purpose.

Carnegie Foundation Classification

The 1994 classification system created by the Carnegie Foundation for the Advancement of Teaching is included in the Directory to help users of this information further delineate institutions by type. This classification, which dates back to 1970, currently includes approximately 3,600 colleges and universities in the United States that are degree-granting and accredited by an agency recognized by the Secretary, U.S. Department of Education. The 10 categories that make up the new classification scheme are based largely on academic mission and are not intended to measure quality. Institutions are classified according to their highest level of offering, the number of degrees conferred by discipline, and the amount of federal support for research received by the institution. Some categories also rely on the selectivity of the institution's admissions.

Information provided by the Carnegie Foundation was matched against the IPEDS "Institutional Characteristics" file and the codes are indicated in the institutional listings where matches were certain. It is important for users to note that IPEDS includes separate listings for all branches of an institution, whereas, in some instances, Carnegie lists only one campus (which encompasses the main campus and all branches). Each of the categories, and the coding scheme used in this Directory, are explained below:

RESEARCH UNIVERSITIES I (RES I)

These institutions offer a full range of baccalaureate programs, are committed to graduate education through the doctorate, and give high priority to research. They award 50 or more doctoral degrees each year. In addition, they receive annually $40 million or more in federal support.

RESEARCH UNIVERSITIES II (RES II)

These institutions offer a full range of baccalaureate programs, are committed to graduate education through the doctorate, and give high priority to research. They award 50 or more doctoral degrees each year. In addition, they receive annually between $15.5 million and $40 million in federal support.

DOCTORAL UNIVERSITIES I (DOC I)

These institutions offer a full range of baccalaureate programs and are committed to graduate education through the doctorate. They award at least 40 doctoral degrees annually in five or more disciplines.

DOCTORAL UNIVERSITIES II (DOC II)

These institutions offer a full range of baccalaureate programs and are committed to graduate education through the doctorate. They award annually at least 10 doctoral degrees (in three or more disciplines), or 20 or more doctoral degrees in one or more disciplines.

MASTER'S (COMPREHENSIVE) UNIVERSITIES AND COLLEGES I (MAST I)

These institutions offer a full range of baccalaureate programs and are committed to graduate education through the master's degree. They award 40 or more master's degrees annually in three or more disciplines.

MASTER'S (COMPREHENSIVE) UNIVERSITIES AND COLLEGES II (MAST II)

These institutions offer a full range of baccalaureate programs and are committed to graduate education through the master's degree. They award 20 or more master's degrees annually in one or more disciplines.

BACCALAUREATE (LIBERAL ARTS) COLLEGES I (BACC I)

These institutions are primarily undergraduate colleges with major emphasis on baccalaureate degree programs. They award 40 percent or more of their baccalaureate degrees in liberal arts fields and are restrictive in admissions.

BACCALAUREATE COLLEGES II (BACC II)

These institutions are primarily undergraduate colleges with major emphasis on baccalaureate degree programs. They award less than 40 percent of their baccalaureate degrees in liberal arts fields or are less restrictive in admissions.

ASSOCIATE OF ARTS COLLEGES (AA)

These institutions offer associate of arts certificate or degree programs and, with few exceptions, offer no baccalaureate degrees.

SPECIALIZED INSTITUTIONS

These institutions offer degrees ranging from the baccalaureate to the doctorate. At least 50 percent of the degrees awarded by these institutions are in a single discipline.

(Theo) Theological seminaries, Bible colleges and other institutions offering degrees in religion: This category includes institutions at which the primary purpose is to offer religious instruction or train members of the clergy.

(MED) Medical schools and medical centers: These institutions award most of their professional degrees in medicine. In some instances, their programs include other health professional schools, such as dentistry, pharmacy, or nursing.

(Health) Other separate health profession schools: Institutions in this category award most of their degrees in such fields as chiropractic, nursing, pharmacy, or podiatry.

(ENG) Schools of engineering and technology: The institutions in this category award at least a bachelor's degree in programs limited almost exclusively to technical fields of study.

(BUS) Schools of business and management: The schools in this category award most of their bachelor's or graduate degrees in business or business-related programs.

(FINE ARTS) Schools of art, music, and design: Institutions in this category award most of their bachelor's or graduate degrees in art, music, design, architecture, or some combination of such fields.

(LAW) Schools of law: The schools in this category award most of their degrees in law. The list includes only institutions that are separate entities or campuses.

(TEACH) Teachers colleges: Institutions in this category award most of their bachelor's or graduate degrees in education or education-related fields.
