The 2007 MIS Conference is a concentrated 3 days of information about best practices, innovative ideas, current issues, and practical how-to advice about management information systems for K-12 education. Co-sponsored by the Georgia Department of Education and the U.S. Department of Education’s National Center for Education Statistics (NCES), the MIS Conference brings together the people who work with information collection, management, transmittal, and reporting in school districts and state education agencies.

Over the past 20 years, a state education agency has partnered annually with NCES to bring local, state, and national data professionals together to learn from one another in an informal setting. This year, the MIS Conference will offer more than 60 presentations, demonstrations, and workshops conducted by practitioners from K12 information systems.

You are invited to attend the 2007 MIS Conference in Atlanta, Georgia, and to submit a proposal for presenting a session that will add to the conference’s interest and usefulness. Topics are invited from all sources, but the major focus will be on data models, data standards, statewide data systems, and data quality.
