NCES STATS-DC Summer Data Conference

Bethesda, MD | July 27 – 29, 2011

Data Mapping: Step One in CEDS Adoption

Today's Agenda

- ❖ Welcome and Introductions
- ❖ Overview of AITF
 - Purpose and Scope
 - Levels of Adoption
- ❖ Data Mapping
 - Methodology
 - Implementation Example: Illinois
- ❖ PESC and SIF Mapping
 - Alignment to CEDS
 - Next Steps in Implementation
- ❖ Questions/Comments

Common
Education
Data
Standards

OVERVIEW OF THE ADOPTION AND IMPLEMENTATION TASK FORCE (AITF)

Purpose and Scope

- Drive awareness of CEDS
- Promote voluntary adoption of CEDS elements
- Provide documentation and tools to
 - Schools
 - Districts
 - Postsecondary institutions
 - States
 - Policymakers
 - Researchers
 - Vendors

Purpose and Scope

- Advocate voluntary adoption
- Develop and implement adoption plans
- Capture feedback
- Provide support to implementers

Who we are

- State and federal education agencies
- Districts and schools
- Institutions of higher education
- Researchers
- Trade associations
- Vendors

Getting Involved

- Tier 1
 - Meets weekly on Thursday at 1:00 pm Eastern via webex
 - Primary working group
- Tier 2
 - Monthly forums on the first Thursday of every month at 1:00 pm Eastern
 - Adoption and implementation resource

Please contact Kimberly Rhodes at Kimberlyr@ccsso.org if you interested in becoming either a tier 1 or 2 member.

Adoption Defined

An organization (schools, districts, postsecondary institutions, states, researchers, and the vendor community) is considered to have adopted the CEDS standards when they have met one of the levels defined below. Data standards are critical to the interoperability necessary to ensure continuous improvement across all sectors of the education enterprise. It should not be implied that an organization must change their current physical data systems to adopt CEDS.

Adoption Defined

Lets break it down....

Adoption Defined

An organization

- schools,
- districts,
- postsecondary institutions,
- states,
- researchers, and
- the vendor community

is considered to have adopted the CEDS standards when they have met one of the levels (of adoption)

Data standards are critical to the interoperability necessary to ensure continuous improvement across all sectors of the education enterprise.

It should not be implied that an organization must change their current physical data systems to adopt CEDS.

Adoption Levels

- **Level 1 – Acknowledgement & Recognition:** The organization has analyzed and acknowledges that the CEDS is vital to optimizing the ability for state/district/postsecondary institution student information systems to share, compare, and analyze these elements. However, there are legislative or other barriers that need to be overcome in order to make the formal decision to accept the data definitions, terminology, relationships, and code sets for a core subset of data elements.
- **Level 2 – Agreement and Acceptance:** The organization has made a formal decision to accept the data definitions, terminology, relationships, and code sets for a core subset of data elements commonly used by and among state/district/postsecondary institution student information systems. This acceptance will be reflected by either adoption of or mapping to the CEDS. The subset of data elements will vary based on the data being shared, compared, and/or analyzed in Level 5.

Adoption Levels

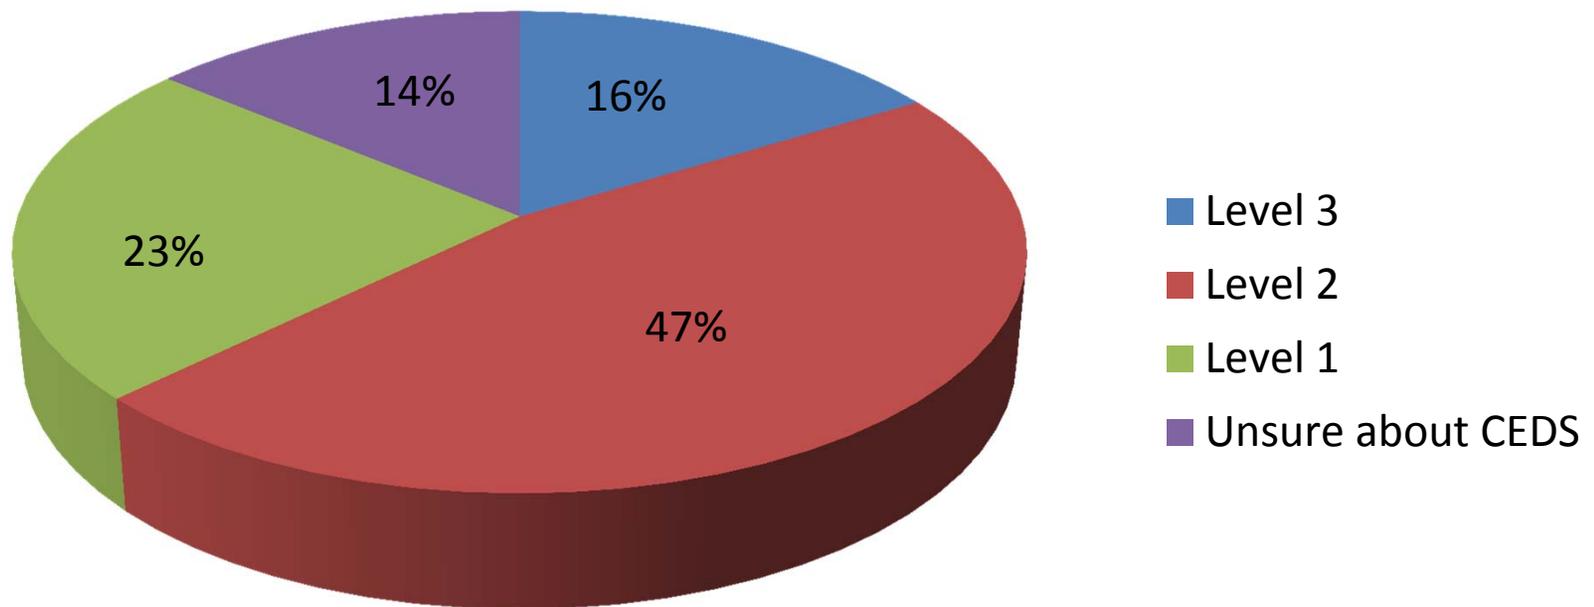

- **Level 3 – Technically Documented:** The organization has mapped to and can publish technical documents with metadata* that includes, the data definitions, terminology and code sets for a core subset of data elements commonly used by states in their P-20 SLDSs. The subset of data elements will vary based on the data being shared, compared, and/or analyzed in Level 5.

**In common usage, metadata stores data about the structure, context and meaning of raw data, and computers use it to help organize and interpret data, turning it into meaningful information*

Adoption Levels

- **Level 4 – Ready to Exchange**: Has stored and/or has the capability to represent, the data definitions, terminology, relationships, and code sets for a core subset of data elements commonly used by state/district/postsecondary institution student information systems and enables these systems to share, compare, and analyze these elements.
- **Level 5 – Operational**: The organization is operationally sharing, comparing, and analyzing data with at least one stakeholder partner using CEDS.

Adoption & Implementation Update

Data Mapping Methodology

- ✓ “It doesn’t exist if it’s not written down.”
- ✓ “No homework.”
 - Get the artifact, map, or review live on WebEx.
- ✓ 10 Steps to CEDS Mapping
 - Compare a new element with an existing list.
 - If it is a new name for a comparable thing, map it.
 - If it is not comparable to an existing thing, add it.

Metadata Map & Gap

State Core ODS Review

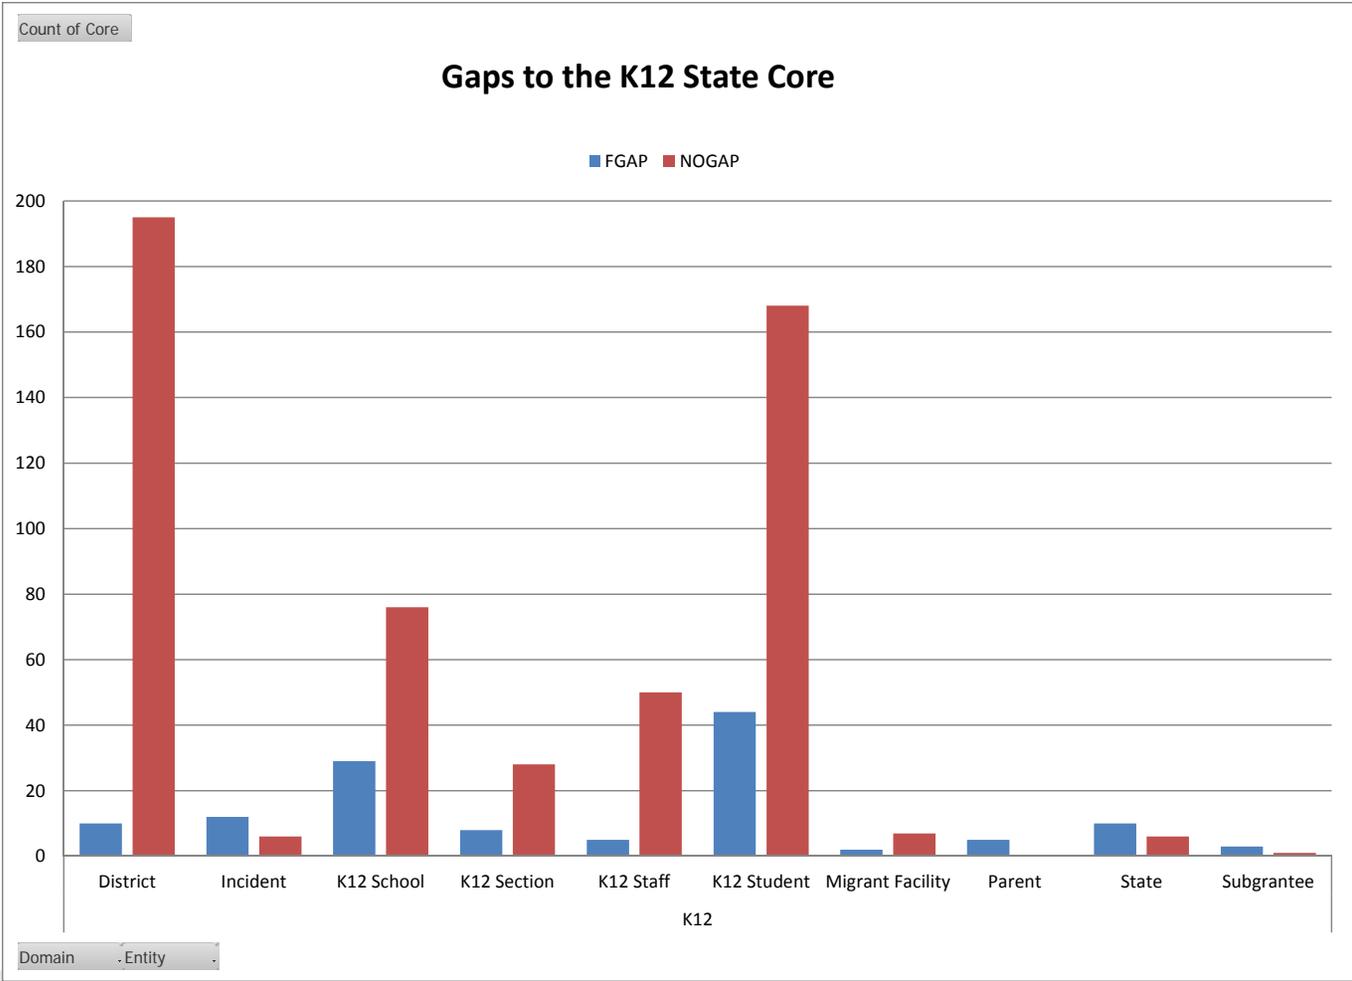

SEA Involvement in Mapping

- Metadata Map & Gap
 - 1 hour Discovery Webex
 - Larger state team
 - 1 hour mapping validation (occurs 2-5 times)
 - SEA expert(s)
 - 1 hour Final Presentation Webex
 - Larger state team

PESC AND SIF MAPPING TO CEDS

Common
Education
Data
Standards

CEDS – SIF/PESC

SIF and PESC serve as field-based sources for CEDS.

SIF and PESC are also implementations of CEDS. So if you use SIF and PESC then you are implementing CEDS.

Current Alignment

- Use Cases
- Levels of Education
- Similar Elements
- Common Education Processes

* SIF	Elements Mapped/CEDS Elements
K12Student	70/77
K12Staff	24/28

* PESC	Elements Mapped/CEDS Elements
PSStudent	27/38
PSSection	15/18

* Selected examples. Mapping is still underway.

Next Steps in Implementation

- Review, Validate, and Analyze mapping with PESC and SIF content experts
- Based on analysis, continue to develop implementation strategies
- Provide comments on Draft 1 and 2 of CEDS Version 2
- AITF to develop implementation guidelines and tools
